

Grocery Store!

Names: _____

Goal: Use the nutrition label on a grocery item to measure out the amount of sugar in a single serving.

Grocery Item: _____

Amount of sugar in a single serving: _____g

Calculate the amount of sugar in teaspoons:

$$\frac{\quad \text{g}}{\quad} \times \frac{1 \text{ teaspoon}}{4.2 \text{ g}} = \frac{\quad \text{teaspoons}}{\quad}$$

Using the measuring spoons measure out the amount of sugar into a cup. Label the cup with the name of the grocery store item and return to the grocery store table.
