FROM THE CHAIR

Writing this in the last week in November, I want to start by wishing everyone Happy Holidays. We have much to be thankful for. We have recruited two very strong residency classes in the last two years, and I have been impressed with each of these new residents with whom I’ve worked in the operating rooms. So far this year, the resident applicants look to be similarly outstanding. We have outstanding, dedicated, and stable faculty who uniformly deliver excellent clinical care, are engaged educators, and are academically productive. We published 169 manuscripts last year and our department is ranked fourth in the country in NIH support! As noted throughout this newsletter, many of our faculty are in local, national and international leadership roles. In particular, I want to congratulate Dr. Karen Domino on completion of her role as chair of the ASA annual meeting program this year.

I am of course biased, but I and many others felt this meeting was the best in at least two decades. I also want to congratulate Dr. Karen Souter on her election to president of the Association of Anesthesiology Core Program Directors. The AACPDD is very influential in guiding the direction of residency training, and there is considerable national momentum for innovation in anesthesiology residency training. So, I am thankful that Dr. Souter will be a leader in guiding these changes and making sure that they happen here. Finally, I want to thank everyone in the department, faculty, trainees, and staff, for their hard work and dedication to our three overlapping missions of delivering the highest quality clinical care, training and educating students and physicians in perioperative care and pain management, and advancing the fields of anesthesiology, perioperative and critical care medicine, and pain medicine through scholarship and discovery. Thank you and have a happy, peaceful and safe holiday season.

CONGRATULATIONS

Dr. Souter was elected President of AACPDD – Association of Anesthesiology Core Program Directors for a two year term: 2015 – 2017.

Representing Program Directors of all 131 anesthesiology residency programs in the U.S.A.

Karen J. Souter, MBBS, FRCA, MACM
UW Medicine Professor, Vice Chair for Education & Residency Program Director, UWMC
CONGRATULATIONS (cont.)

Congratulations—Dr. Domino!

Congratulations to Dr. Karen Domino on completion of her role as chair of the ASA annual meeting program this year.

2015 ASA Notable Presentations

Refresher Course Lectures:
Aaron Joffe
Itay Bentov
Deepak Sharma

Workshops:
Adrian Bosenberg
Agnes Hunyady

Medically Challenging Cases:
Chris Barnes
Anda Cornea
Carlos Delgado
David Frey
Sheena Hembrador
Michael Kallilie
Sarah Khorsand
Patrick Lang
Li Li
Stephanie Pan
Ben Simmons

 Panels:
Armagan Dagal
Matthew Hallman
Aaron Joffe
Burkhard Mackensen
Lynn Martin
Alec Rooke
Deepak Sharma
Monica Valvilala

ASA Presentations (3):
Point/Counterpoints:
Peter Dunbar
Deepak Sharma

Clinical Forum:
Armagan Dagal

PBLDs:
Sanjay Bhananker
Chris Kent
Julia Metzner
Deepak Sharma
Stephen Thilen

A complete list of all department presentations at this year’s ASA Annual Meeting can be found on the Department website at the following address:
CONGRATULATIONS (cont.)

Seattle Met Magazine’s Top Doctors 2015

Alan A. Artru, MD
Professor, A&PM
Chief, Clinical Anesthesiology Services, UWMC
Associate Medical Director for Perioperative Services

John Bramhall, MD, PhD
Associate Professor, A&PM
Harborview Medical Center

Dermot Fitzgibbon, MB BCh
Professor, A&PM;
Adjunct Professor, Department of Medicine;
Medical Director: Inpatient Pain Service, UWMC;
Oncology Pain Clinic, UWMC;
and Pain & Anesthesia Services, SCCA

David Tauben, MD
Clinical Professor & Chief, Division of Pain Medicine

Seattle Met Magazine’s Top PAs & Nurses 2015

Elizabeth Visco, MHA, CRNA
Chief CRNA, Anesthesiology & Pain Medicine
Harborview Medical Center

Andrea Breuner, PA
Anesthesiology & Pain Medicine, Division of Pain Medicine
Harborview Medical Center

Congratulations—Dr. Opp

Dr. Mark Opp has been appointed the Founding Editor-in-Chief of Neurobiology of Sleep and Circadian Rhythms.

The journal is published by Elsevier, and was officially launched at the Society for Neuroscience meeting in October.
CONGRATULATIONS (cont.)

2014 CRNA of the Year Award

Congratulations, Dan!

Dan Langille was awarded CRNA of the Year for 2014. He started working at UWMC on October 16, 2005.

Defining characteristics for CRNA of the year award:
- Committed to patient safety
- Demonstrates superior care
- Clinically sound
- Committed to UWMC’s mission and pillar goals

“...you would perceive this individual to be thorough, professional, and worthy of anesthetizing any friend or family member.”

2014 CRNA of the Year Candidates

Rich Babb | Tracy Baxter | Melissa Bennett | Michele Dostal | Jen Farney
Allison Flexner | Kelly Kanary | Pam Kean | Allen Koopman | Dan Langille
Quynh Le | Chris McGrann | Matt Moody | Amber Ross | Robyn Seaburg
Renee Sliker | Cat Small | Connie Walton | Dorota Ward | Gail Wiener
Allyn Wilcock | Scott Wong

Congratulations—Dr. Vavilala!

Congratulations, Monica!

**Dr. Monica Vavilala (PI) has received a two-year grant in the amount of $440,690 from NIH/NINDS for the project period: September 01, 2015—August 31, 2017, in support of her study on “Vasoactive Agents and Cerebral Outcomes in Brain Injury.”**

This research will examine whether and how choice of vasoactive agent affects brain outcomes (cerebral hemodynamics, cerebral perfusion characteristics, and the NVU) in pediatric TBI by age and sex.

**Dr. Monica Vavilala (Co-PI) has also received a five-year grant in the amount of $173,745 from U Pennsylvania/NIH flow-through, for the project period: September 01, 2015—August 31, 2020, in support of her study on “Pressor Choice Influences Protection of Autoregulation in Brain Injury.”**

This proposal leverages translational expertise in relation to children with TBI and fosters bi-directional translational research.

Push Against Gun Violence Gets $500,000 in Federal Help

$50,000 will go to Harborview’s Injury Prevention & Research Center to partially fund research into gun violence prevention.

**Dr. Monica Vavilala**, Director of the Injury Prevention and Research Center at Harborview, said “Past research shows that survivors of shootings are 20 times more likely to be shot again... The question for researchers is how to prevent the survivors from ending up back at the hospital... We are trying to figure out an effective strategy to decrease the morbidity that these patients have and to improve their quality and quantity of life...”

“The research will involve a randomized controlled trial in which half the hospital’s adult survivors of gun violence will receive the usual medical care and social-work engagement, she said. The other half will receive enhanced care over six months that could address employment, housing, mental-health issues and more...”

“We’re very grateful for the opportunity to launch what we think is a really important initiative which is how best to prevent future gun crimes and future injuries from gun violence.”

More Grant Awards

Congratulations, Dr. Bhananker!
Dr. Sanjay Bhananker has received a one-year grant in the amount of $94,214 from The Medicines Company for the project period: August 4, 2015—June 29, 2016, in support of his study on “An open label evaluation of the safety and clinical utility of the active, separated system with enhanced controller (55EC) fentanyl 40 mcg for the management of acute postoperative pain in pediatric patients 12 to less than 18 years of age.”

Congratulations, Drs. Sullivan and Theodore!
Drs. Mark Sullivan (PI) and Brian Theodore (Co-PI) have received a two-year grant in the amount of $700,000 from Pfizer for the project period: September 15, 2015—September 15, 2017, in support of their study on “PainTracker Self-Manager (PTSM): a web-based platform to promote and track chronic pain self-management and other treatment outcomes.” This project will develop and test PTSM, that can support multimodal care in a wide variety of specialty and primary care settings. PTSM is a tool that will help assess, engage, activate and support patient’s efforts to self manage their chronic pain in collaboration with their physicians and other providers.

Congratulations, Dr. Jennifer Rabbitts!
Congratulations, Dr. Wang!

2015 Research Excellence – Gail Patrick* Innovation Award Recipient†
Wang Wang, MD, PhD, from the University of Washington in Seattle, is the 2015 recipient of the Gail Patrick Innovation Award. His project focuses on innovative imaging studies to examine the mechanism by which hydrogen peroxide stimulates insulin secretion and whether this mechanism is disrupted in type 2 diabetes, when β-cells fail to compensate for insulin resistance. The results may define new therapeutic targets and treatments to ameliorate type 2 diabetes symptoms and complications.

“The Gail Patrick Innovation Award is granted annually to the highest scoring Innovation Award applicant. Awardees receive $50,000 per year for 2 years to support the pursuit of an innovative idea that advances the American Diabetes Association’s efforts to prevent, treat, and cure diabetes and to improve the lives of all people affected by the disease.” From Diabetes Pro Quarterly, Fall 2015.

Congratulations, Dr. Emily Law!

On 9/25/2015, Dr. Law received an NIH award in the amount of $139,238 in support of her study on “Psychosocial and Family Risk in Pediatric Chronic Migraine.”

Congratulations, Dr. Anne Lynn!

On 8/27/2015, Dr. Lynn received a Subaward in the amount of $43,780 from a nonprofit organization in support of her study on “Neurocognitive Outcomes 5 Years after Infant Anesthesia.”

Congratulations, Dr. Tauben, Loeser, Doorenbos and Deb Gordon!
These Co-Directors have received a five-year NIH Funded Center grant for the project period: September 15, 2015—October 14, 2019, in support of their study on “NIH Center of Excellence in Pain Education.” This project will create evidence-based, learner-centered, interprofessional pain management curriculum resources to be delivered to students in all six UW health science schools, at partner universities, and nationally at professional conferences and online, in addition to other providers. APM faculty on the grant include: Brian Ross, MD, PhD; Greg Terman, MD, PhD; Heather Tick, MD; Brian Theodore, PhD; Dennis Turk, PhD; Monica Vavilala, MD; Gary Walco, PhD.

Congratulations, Drs. Tauben, Loeser, Doorenbos and Deb Gordon!
Congratulations, Dr. Jennifer Rabbitts!

Dr. Rabbitts was awarded a one year grant, in the amount of $32,200 from the Translational Research Ignition Projects Program, Center for Clinical and Translational Research, Seattle Children’s Hospital for the project period: October 1, 2015—September 30, 2016, in support of her study entitled “Persistent Pain and Poor HRQOL Related to Pediatric Surgery: child, parent, and provider perspectives.”

Congratulations, Dr. Wang!
CONGRATULATIONS (cont.)

Congratulations — Outcomes Grant Award Recipients! (Department funds will be allotted to the following 5 proposals)

“Randomized, Prospective Clinical Study Aiming to Assess the Impact of Cerebral Monitoring-guided Therapy on Cerebral Outcomes after Cardiac Surgery”— Kei Togashi (PI), Burkhard Mackensen, Daniel Raftery
Specific Aims: Assess the transcerebral metabolomic profile and neurocognitive outcome in response to cerebral injury in patients monitored and treated according to cerebral oximetry (NIRS) and those that are just monitored with NIRS. (1) Test the plasma concentrations of metabolites representing the amino acid, carbohydrate, energy, lipid, and nucleotide pathways using nuclear magnetic resonance (NMR) and mass spectrometry. (2) Compare the neurocognitive function of treated and untreated patients using a comprehensive test battery consisting of 5 assessment modalities at baseline, at the time of discharge and 6 weeks postoperatively.

“Peri-operative Outcomes Assessment: Tracking Trajectories of Pain, Function and Health”— Jennifer Rabbits (PI), Tonya Palermo, Michele Curatolo, Debra Gordon
Specific Aims: Evaluate feasibility of a comprehensive peri-operative outcomes assessment approach measuring pain, functional, and health outcomes after surgery. Hypothesis 1: High quality outcomes data will be captured, as demonstrated by acceptable response rates, retention rates, and completion rates utilizing electronic self-reported measures to monitor post-surgical pain, functional, and health outcomes across different age groups and hospital sites.

“A Patient-centered Study of the Short and Long-term Effects of Peripheral Nerve Blocks on Pain and Functional Recovery after Anterior Cruciate Ligament Repair”— Vanessa Loland (PI), Janet Pavlin
Specific Aims: The study will compare postoperative pain, and analgesic use, and side effects, and speed of rehabilitation and return to normal function after surgery in patients treated by one of three protocols for postoperative pain control: (1) femoral nerve block, (2) saphenous nerve block in the adductor canal, (3) no nerve block.

“The Impact of Perioperative Sleep on Postoperative Outcomes: A Pilot Study Examining the Use of Wearable Cellphone Based Sleep Monitoring Device”— Deepak Sharma (PI), Mark Opp, Jay Hecker, Greg Terman
Specific Aims: (1) Examine the feasibility and utility of commercially available, wearable, cellphone-based sleep monitoring device (Fitbit) for interrogating sleep measures in the perioperative period. (2) Examine the association of perioperative sleep pattern with postoperative sleep pattern. (3) Examine the association between pre- and postoperative sleep patterns and postoperative pain.

“The Effect of Malnutrition on Outcomes after Pediatric Cardiac Surgery”— Faith Ross (PI), Greg Latham, Mike Richards, Mike Eisses, Denise Joffe, Douglas Thompson, Jeremy Geiduschek, Monique Radman
Specific Aims: In this pilot study, we propose to evaluate if preoperative malnutrition is an independent risk factor for increased perioperative mortality in a large sample of congenital heart surgery patients.

Dr. Sam Sharar’s Work in Bhutan

Dr. Sam Sharar has been traveling to Bhutan each year, in spring or fall, since 2009 with a small group of burn surgeons, anesthesiologists, and nurses to work in partnership with the Bhutanese government to improve burn care in this mountainous Himalayan country—where fires are commonly used for heating and cooking, burn injuries are common, and no organized burn care exists. More recently, the emphasis is on partnering to improve education in Bhutan’s new residency programs (started in 2014) in both the didactic setting (e.g., e-learning resources) and the clinical setting (teaching in the operating room). According to Dr. Sharar, “the Buddhist temples (dzongs) are among the most spectacular in the world (the one on the mountain—far left—is Taktsang [Tiger’s Nest] and the other (far right) is Punaka [with our guide and my best friend here, Kunley]).” The two middle photos are identified in the reprint from the UW Medicine website. Claire Hagerty wrote about this medical group’s efforts in 2011 to come to the aid of this rural community that was in great need of medical assistance (excerpt shown below).

BURN CARE FOR BHUTAN by Claire Hagerty | UW MEDICINE VOL. 34, NO. 2, FALL 2011. A REPRINT FROM THE WEB EDITION.

Globally, burns are a serious public health problem. More than 195,000 deaths occur annually worldwide from fires alone, according to the World Health Organization, and burn fatalities are among the leading causes of death for children and young adults between the ages of 5 and 29. Of these fire-related deaths, more than half take place in Southeast Asia, and females in this region account for the highest burn mortality rates globally. Open fires used for cooking and heating in rural areas are a major cause of burn-related injuries and deaths. In addition to those who die, millions more whose wounds go untreated face lifelong disfigurement and disability—often accompanied by stigma and rejection.

One place where this grim reality is evident is in the beautifully bucolic and mountainous Kingdom of Bhutan, secluded in the Eastern Himalayas between Tibet and China. That’s where the UW Medicine Burn Center team has been working on burn care in Bhutan since 2008, under the leadership of burn surgeon David M. Heimbach, MD, now retired from UW Medicine’s Department of Surgery, has joined other healthcare professionals from around the world to care for burn patients, share best practices, and train Bhutanese providers in the latest burn treatment methods. Together, they are fundamentally changing burn care in Bhutan. Since 2008, that’s exactly what staff from the UW Medicine Burn Center at Harborview have been doing. Each year, they travel to Bhutan’s capital city of Thimphu as part of the Global Burn Care & Reconstructive Institute, a nonprofit volunteer medical services group founded in 2001 by Margrit Elliot, R.N., a retired nurse from La Conner, Wash. Elliot’s volunteer work in Bhutan, Tibet and China, which began in the late 1980s, has first focused on surgeries to repair cleft palates. “But, based on the number of burn victims we encountered throughout the years, it became evident that initial burn care was very much needed,” she explains. “(The full story can be viewed at the following website. http://depts.washington.edu/givemed/magazine/2011/10/burn-care-for-bhutan/)."
CONGRATULATIONS (cont.)

Dr. Chi Fung Lee, Senior Fellow at the Mitochondria and Metabolism Center, was selected as a finalist for the 2015 Melvin L. Marcus Young Investigator Award.

The selection was made based on the scientific merit of an unpublished manuscript from Rong Tian’s laboratory, of which Dr. Lee is the first author. The Marcus Award is the highest honor awarded by the AHA to research in cardiovascular and circulatory physiology by young investigators. Oral abstract competition were held at the Scientific Sessions in November.

Welcome New Faculty Member

Lance Patak, MD
Assistant Professor
SCH (started 10/01/15)

NOTE:
This listing, from a general search through PubMed, may not include your publication(s) since it is not possible to capture all permutations. In addition we have found that not all publications are listed in PubMed.
If you would like to make sure that your published papers are acknowledged in the Indexer, please email your citations to Julie Baker at bakerjava@uw.edu, or submit via Catalyst Survey at: Submit publications.

DEPARTMENT TRANSITIONS

Departures
Craig Brownson, Pain Division Administrator, will be leaving the department on December 31st to take a position in the Department of Surgery.

New Staff
Yang Cao, Senior Research Fellow, started in Dr. Tian’s Lab at SLU on November 1st.

Title Changes
Rosemary Orr, MB BCH, UW Medicine APM Professor, SCH, will be changing status to Professor Retired on January 1st. She plans to continue clinical work at SCH.
Chun-Ling Sun, SLU-Crowder Lab, title change on 10/1/2015 from Acting Assistant Professor to Research Assistant Professor.
Haiwei Gu, SLU-Rafter Lab, title change on 10/1/2015 from Acting Assistant Professor to Research Assistant Professor.

Promotions
Tim Adams, was promoted on September 1, 2015, from Budget Fiscal Ops Supervisor to Budget Fiscal Ops Manager.
Natalie Collins, was promoted on October 7, 2015, from Faculty HR/P Specialist to Faculty Affairs Specialist.

In Remembrance of Patricia Ann (Pat) Reynolds (April 11, 1934 – October 13, 2015)
By Thomas F. Hornbein, MD

Pat was my #1 secretary for the nearly sixteen years I succeeded John Bonica as chair of our department. I stole her from Fred Cheney when we shared adjacent offices. Pat and I learned our new roles together. When I stepped down from the chair in mid-1993, Pat returned to Fred, my successor, all trained, helping him to learn a new role as acting chair, which he liked so much, thanks in part to Pat, that he decided to quit the acting part. Pat retired from UW in July 1996 after almost two decades in our department. According to her daughter Susan, Pat started working in the department in 1968.

It was apparent at the time, and even more so looking back, that I had two women trying to keep me on track—my wife, Kathy, and Pat. Both were pros in their professions. They connived to enable a slow learner to become a leader. Pat, and later Karen Low, our departmental administrator, were my life support system. Pat was unflappable, cool in times of stress, the gate-keeper to the chair’s inner sanctum, the one who kept track of where I was supposed to be and when and with what. She could question my judgment at times in ways gentle to the male ego. She booked appointments, got me to meetings, oversaw a massive correspondence that in those days was mostly dictated (in part because of my micrographic illegibility). At the beginning this was an era of something called a typewriter (see Pat’s pic above) and the volume of stuff exiting my mouth to tape required a second secretary simply to type. She protected my time and tried to keep me connected to my family.

Pat was a precious gift, a piece of the foundation that underpinned some big, challenging and mostly joyful years of my life. She took the bus home each evening to apply the same attributes to tending husband, Earl, and daughters Susan and Kathy. In her latter years she parlayed those beginnings into becoming the matriarch and great-grandparent of a most extensive clan. I think Fred and I were beneficiaries of the same caring.

Pat’s passing evokes a mix of sorrow softened by a flood of so many rich memories that make this inevitable moment in all our lives a time, at least for me, of joyful sadness.

By Fred Cheney, MD

Pat read my mail and suggested solutions to problems based on her prior experience as the Chair’s Assistant (todays term for secretary). She tried to spare me the time involved handling mundane (and some not so mundane) problems when I suddenly became Chair. Pat was giving me the benefit of what she had learned ... in a very efficient manner... she was very protective of the Chair’s time and very devoted to her boss.

From Amy (Auestad) Florence, the last correspondence secretary who reported to Pat
I have wonderful memories of working with Pat. She was truly kind and gentle and had a rather mischievous sense of humor under her very professional demeanor.

As many of you probably know, Gene Peterson, a former faculty member in our department, recently died from cancer. Gene was a valued member of our department and a good friend to many. He started working in the department as Assistant Professor in 2002; and he left on October 1, 2013, to take a position as Chief System Quality Officer and Associate Dean of Patient Safety at Virginia Commonwealth University in Richmond, Virginia. Gene and his wife, Sarah, raised their family in the Seattle area for 30 years and hold dear lasting friendships and memories.

From His Obituaries:
Gene was an anesthesiologist at Swedish-Edmonds (formerly Steven’s Memorial Hospital) and worked at Edmonds Anesthesia Associates. Gene worked at the University of Washington Medical Center for 11 years, most recently as associate medical director and co-director of the Center for Clinical Excellence. Gene graduated summa cum laude from Lawrence University in Appleton, WI (1976) with a Bachelor’s Degree in Physics; as one of 30 Marshall Scholarships he earned a PhD in Physical Chemistry (1980) at the University of Leeds, United Kingdom; he graduated from the University of Chicago Medical School (1982), and received a Master’s degree in Health Administration from the University of Washington (2004). Gene was a practicing anesthesiologist his entire medical career. He went to VCU Health in 2013 to become its first Chief Safety Officer and Associate Dean for Medical Education, a role that was unique in the nation. Because of his vision and his development of care delivery models, an endowed professorship was established at VCU Health and Gene was appointed the first Professor of Quality, Safety, and Service in Resident Education.

A memorial service and celebration of his life will be held at VCU Health on Wednesday, December 16th at 4:00 pm, and a funeral service will be held at St. Stephens Episcopal Church in Richmond on Monday, December 21st, at 4 pm. A celebration of Gene’s life will be held in Edmonds, WA, in March 2016 (details forthcoming).

Memorial donations may be made to the University of Washington Medical Center’s Social Work Emergency Fund which provides needy patients and families with resources such as food, transportation, and financial assistance. To make an online gift visit the UW Medicine Foundation’s Make a Gift site: http://depts.washington.edu/giveweb/give/ and search for: UWMC Social Work Emergency Fund. Checks may also be mailed to: UWMC Social Work, 1959 NE Pacific Street, Box 356125, Seattle, WA 98195.

Gene N. Peterson, MD, PhD, MHA
CONGRATULATIONS ACGME AND FACULTY FELLOW GRADUATES!

CALL FOR 2016 T32 APPLICATIONS

♦ Call for applications for T32 Anesthesiology Postdoctoral Research Training Program, beginning JULY 1, 2016.
♦ Applicants must identify a potential faculty mentor, and develop a proposed research plan in consultation with that mentor to be submitted with the application due on JANUARY 15, 2016.
♦ For information on applying to the program, please see: https://depts.washington.edu/anesth/education/fellows/T32.shtml. Or contact: Dr. Tonya Palermo (palermot@uw.edu), or Dr. Marge Sedensky (sedensm@uw.edu).

DEPARTMENT / LOCAL SEMINARS & MEETINGS

Mark Your Calendar

Annual Department Faculty Retreat

Date/Time:
Saturday, February 6th
7:30 am —

Location:
UW Medicine
South Lake Union

(more details to follow)

Seminars in Pain Medicine

Tuesdays 5:00-6:00 pm — 3rd Fl. Conference Room, Roosevelt 1, Family Medicine
Contact: Dr. Rebecca Dale at rdale@uw.edu

January 5:  “QST in Pain Disorders” — Dr. Misha Backonja
January 12:  “Pain Anatomy and Physiology” — Dr. Jiang Wu
January 19:  “ILESI vs. TFESI, pros and cons” — Dr. Agi Stogicza
January 26:  “Sleep and Pain” — Dr. Flavia Consens

2016 January Grand Rounds

WED-UW/HSB (D-209)—January 6th — “Dexamethasone as an Opioid-Sparing Adjuvant Analgesic in the Perioperative Period” — Margaret (Greta) Hockett, MD, UW Medicine Acting Assistant Professor, Anesthesiology & Pain Medicine, Veterans Affairs Puget Sound Health Care System, Seattle.

WED-UW/HSB (A-420 Hogness Auditorium) | January 13th | Combined GR with Surgery
“The Hippocratic Paradox: The Role of Medical Professionals in Capital Punishment in the United States.” Jonathan I. Groner, MD, Professor of Clinical Surgery, Department of Surgery, Pediatric Division, The Ohio State University College of Medicine, Columbus, Ohio

WED-UW/HSB (D-209)—January 20th — UW A6 PM ACGME Pain Fellow Presentations:
“Buprenorphine Perioperative Management.” Burt Gray, DO, Amy Hsu, MD, David Lindenberg, DO, Mike Massey, DO, & Seth Swank, DO, UW Medicine, Department of Anesthesiology & Pain Medicine, Seattle, WA

FOR DEPARTMENT MEMBERS ONLY (Patient Safety CME)
WED-UW/HSB (D-209)—January 27th — “UWMC Continuing Quality Improvement (CQI)”
Wendy Suhre, MD, UW Medicine Assistant Professor, Department of Anesthesiology & Pain Medicine, University of Washington Medical Center, Seattle, WA
NATIONAL MEETINGS

February 18 - 21, 2016 the American Academy of Pain Medicine 32nd Annual Meeting
Palm Springs Convention Center, Palm Springs, California
More information: http://www.painmed.org/annualmeeting/

CCAS 2016 Meeting
March 31, 2016—The Broadmoor, Colorado Springs, CO
More information: http://www2.ccasociety.org/meetings/index.iphtml

SPA-AAP Pediatric Anesthesiology 2016
April 1-3, 2016
The Broadmoor, Colorado Springs, CO
More information: http://www2.pedsanesthesia.org/meetings/2016winter/guide/

ISRRI 8th Scientific Meeting
This international meeting will have a broad scope focusing on digital technologies to improve health across the lifespan and will cover lifestyle behaviors, management of acute and chronic conditions, and mental health. The International Society for Research on Internet Interventions (ISRRI) promotes the scientific study of information and communication technologies targeting behavioral, psychosocial, health and mental health outcomes. For more information: http://www.isrri-conference.com/

Tonya Palermo, PhD, University of Washington, USA Conference Chair
Heleen Riper, PhD, Vrije Universiteit Amsterdam, The NetherlandsISRRI President

The 2016 SOAP 48th Annual Meeting
May 18-22, 2016
Seaport Boston Hotel, Boston, Massachusetts
More information: http://www.seaportboston.com/

IARS 2016 Annual Meeting and International Science Symposium
Improving Health Through Discovery and Education
May 21-24, 2016 • San Francisco, CA
More information: http://www.iars.org/education/annual_meeting/
GRANT OPPORTUNITIES

Department of Anesthesiology & Pain Medicine Special Projects Funds

PURPOSE: Support faculty who have been invited to participate in the scientific program at national meetings (panels, symposia, invited presentations) but who do not have funds to attend.

FUNDS: Funding is provided by un-used rollover from faculty educational allowance.

AMOUNT: Awards of up to $1,000 will be made.

CONTACT: Dr. Opp for information on requesting Special Projects Funding: mopp@uw.edu

*Important for Federal grant applications*

Central IRB: The use of a single IRB to provide review for all of the study sites in a multi-site clinical trial.

⇒ NIH is increasingly likely to require a central IRB

⇒ The UW IRB is not able to be a central IRB

⇒ Read the federal funding announcement

⇒ Consult with the HSD Director for assistance before submitting your application!

⇒ More Information: Karen Moe at 543-0998 or kemoe@uw.edu

http://www.washington.edu/research/hsd/announcements/

FELLOWSHIP OPPORTUNITIES

- The National Research Council of the National Academies sponsors a number of awards for graduate, postdoctoral and senior researchers at participating federal laboratories and affiliated institutions. These awards include generous stipends ranging from $45,000 - $80,000 per year for recent Ph.D. recipients, and higher for additional experience. Graduate entry level stipends begin at $30,000. These awards provide the opportunity for recipients to do independent research in some of the best-equipped and staffed laboratories in the U.S. Research opportunities are open to U.S. citizens, permanent residents, and for some of the laboratories, foreign nationals.

- Detailed program information, including online applications, instructions on how to apply and a list of participating laboratories is available on the NRC Research Associateship Programs Website (see link above).

- Questions should be directed to the NRC at 202-334-2760 (phone) or rap@nas.edu

Reminder for all faculty at UWM, HMC, SCH, VAMC and SLU...

In order to properly account for your time as effort or billable activity, our Department needs to know if you are listed on any grants outside of the Department as a Co-PI or consultant but do not request salary support. While we have good records for grants originating within the Department and those that have requested salary support, we need to expand this to all grants in which you are participating, inside as well as outside the Department. Please send copies of currently active proposals that fit this description to Ms. Christina (Tina) Backman, Research Grants Specialist, at cbackman@uw.edu

HUMAN SUBJECTS DIVISION (HSD) APPLICATION PROCESS

Current & Complete IRB Information can be found on the HSD website at: www.washington.edu/research/hsd

Dr. Karen Domino is the Vice Chair for Clinical Research in the department. This role includes responsibility for all IRB activities, including the review of proposals.

Lisa Flint is the recipient of all IRB applications needing departmental review and/or Dr. Domino’s signature. Lisa’s contact information: Box 356540 | lflint@uw.edu | 206-543-7817.

This Information is also available on the department website at: http://depts.washington.edu/anesth/research/irb/contact.shtml
CME Credit is Now Available for Faculty Development Workshops—
These live activities have been approved for AMA PRA Category 1 Credit*. A $40 processing fee for recording and issuing of CME credits will be payable to the CME Office at the end of the year.

Upcoming Workshops:

January 2016

Introduction to Mindfulness**
5 sessions: Sundays, 6:00 – 8:30 PM, Jan. 10, 17, 24 & Feb. 7; retreat Jan. 31, 1:00 – 7:00 PM
Sponsor: Faculty Wellness Program and Office of Graduate Medical Education
Facilitated by Tim Burnett (Mindfulness Northwest), Introduction to Mindfulness employs written and recorded materials to support mindfulness practices in and between classes. Free parking is easily found at South Lake Union on Sundays. Cost: $50 for residents, fellows and family; $150 for faculty and family.
Register: https://catalyst.uw.edu/webq/survey/uwgoal/278528

Enhancing Faculty Wellness: Mindful Morning Mini Retreat*
January 11, 8:00 AM – Noon, Harborview Medical Center, N/JB 707
Sponsor: Faculty Wellness Program
This popular January mini retreat is a great way to start the New Year. Led by Director of Faculty Wellness, Claudia Finkelstein, M.D.C.M. (Clinical Associate Professor, Medicine), the morning includes an overview of Mindfulness and its applications in the everyday routines of healthcare providers. Participants will be introduced to and participate in several sequential practices. Light breakfast will be served.
Register by January 5, 12:00 PM: https://tr.im/VHhW

Time Management & Academic Efficiencies*
January 22, 8:30 AM – Noon, South Campus Center, 316
Sponsor: Office of Faculty Development
Time management strategies are never-ending – but there is so much we can learn from each other about successful strategies. This workshop offers techniques and tools for time management for busy clinicians, physician scientists, basic scientists, and department chairs. Topics include organization, balancing clinical work with having a family, running a lab and even running a department from our faculty experts. Includes opportunities for small-group discussion for participants to share challenges and ideas.
Register by January 18, 12:00 PM: https://tr.im/bYflq

February

Women Faculty Day*
February 11, 8:00 AM – 5:00 PM, Center for Urban Horticulture, NHS Hall
Sponsor: Office of Faculty Development
More information and registration link are forthcoming.

March

Enhancing Faculty Wellness: Conquering Clutter & Procrastination*
March 7, 8:30 AM – Noon, South Campus Center, room TBA
Sponsor: Faculty Wellness Program
Does clutter threaten to take over your life? Does it take too long to find that desperately needed item? Have you put off for tomorrow what could be done today so often that it seems off forever? This workshop will help explain why you procrastinate and hold on to things. Participants will learn techniques for getting going, managing time better, making good decisions and creating effective systems to meet their personal needs. Led by Ellen Langan (Principal, Langan + Associates), a speaker, trainer, and professional organizer helping people and businesses achieve their maximum potential and providing “pathways to overcome overwhelm.”
Register by March 1, 12:00 PM: https://tr.im/uChuN

Faculty Development Day*
March 16, 8:00 AM – 5:00 PM, Center for Urban Horticulture, NHS Hall
Sponsor: Office of Faculty Development
More information and registration link are forthcoming.
FACULTY DEVELOPMENT (cont.)

Required Training for Research
Provides the UW research community with a single definitive source of information on required trainings related to the conduct of research and includes:
- An overview of all research-related trainings that can be filtered by research area;
- Detailed description of each training, including required frequency/target audience for each course;
- Easy access to training registration;
- Information about the specific federal and state regulation or UW policy that mandates the training requirement;
- Ability to share results from pre-filtered set of results.

Additional information is available at the following website:
http://www.washington.edu/research/compliance/required-training/

Outside Work for Compensation Process Update — NEW FORM 1460
- All faculty Outside Work for Compensation requests must use the new form.
- Forms must be completed and approved in advance of the work performed.
- Completed requests (1460) should be sent to Fred Hilerio at hileriof@uw.edu or Box 356540.
- More information on policy and procedures for Outside Work for Compensation can be found on the following department website:
- Send questions to Susan Marx at smarx@uw.edu.

DEA Fee Exemption
All Medical Staff Currently Paying for a DEA Renewal (except CUMG*)
- Some medical staff members are not aware there is a DEA fee exemption for providers working at government institutions, including UWMC, HMC and VAPSHCS. If you are not writing prescriptions outside those institutions, you qualify for this fee exemption.
- Instructions on how to complete the new or renewal DEA form can be found on the department website. Navigate to ADMINISTRATION => For Staff Only => Licensure => UW DEA License Procedure or VAPSHCS DEA License Supplement.
- Or contact Kay Gowan (kgowan@uw.edu) for instructions via email.

* CUMG Faculty: Contact Kimberly.Peterson@seattlechildrens.org for details on fee reimbursement.

Office of Emergency Care Research (OECR)
- To help improve health outcomes of patients who require emergency care, NIH has created OECR.
- Focal point for basic, clinical, translational emergency care research and training.
- OECR will not fund grants.
- It will foster innovation and improvement in emergency care and in the training of future researchers in this field.
