

# Aquatic Chemistry Summer Internships for High School Students

July 5-29, 2016

University of Washington  
School of Oceanography

Are you interested in a 4-week summer internship where you will work with oceanographers, conduct research on the ocean's carbon cycle, and learn about environmental science careers? If the answer is 'maybe' then apply!

**Who:** Students entering their sophomore, junior or senior year of high school in fall 2016.

**What:** A 4-week long internship in an active oceanography lab. A team-based approach to environmental sciences with emphasis on the biochemistry of the oceans. Stipend of \$1000 after completion of internship.

**Where and When:** The School of Oceanography, University of Washington, Organic Geochemistry Lab, July 5–29, 4 days a week (M-Th)

**How to Apply:** Applications can be downloaded online at <http://depts.washington.edu/aog> and are due electronically Friday April 8<sup>th</sup>, 2016.

*Emphasis is on giving people their first experience  
in an environmental research lab.  
No prior lab experience necessary.  
Show us your enthusiasm -apply today!*
