B H

474  Justice in Healthcare (5)  I&S  (10984)
Examination of the ethical problem of allocating scarce medical resources. Emphasizes the fundamental principles of justice that support alternative health policies. Recommended: prior courses in philosophy or ethics. Offered: jointly with PHIL 411.
Jecker   T Th  12:30 - 2:50 pm  T663

485  Concepts of the Body in 19th & 20th Century America (3)  I&S  (10985)
Investigation of ideas relating to corporeal self in nineteenth- and twentieth-century America. Evolution of physical ideals of manliness/femininity, how ideals related to surrounding culture, how different bodily activities developed to realize ideals. Athleticism, physiognomy, beauty contests, body building, decorations, cosmetics, anthropometry, and phrenology.
Berryman   M W  9:30 - 10:50 am  T639

497  Philosophy of Psychopathology (5)  I&S  (10986)
Examine psychopathological phenomena and use them to explore traditional philosophical questions in metaphysics, epistemology and ethics. We will begin by asking what a psychopathology is, and how such pathologies seem to be caused by brain events, but also responsive (sometimes) to reasons. We will then turn to specific common diagnoses: depression, autism, delusions, PTSD, anorexia, addiction, personality disorder, DID/ MPD.
Schellenberg   M W  1:00 - 3:20 pm  BB1602

499  Undergraduate Research (*, max. 5)  (10987)
Investigative work in biomedical ethics or history of the biomedical sciences. To be arranged

514  Legal, Ethical, and Social Issues in Public Health Genetics (3)  I&S  (10988)
Equips the student to anticipate and assess potential legal, ethical, and social barriers complicating the incursion of new genetic advances, information, and technologies into public and private healthcare delivery efforts. Prerequisite: GENOME 361, GENOME 371, or equivalent. Offered: jointly with LAW H 504/PHG 512; W.
Edwards   M W 12:00-1:20 pm  T474
Respectful Death: End of Life Care (3) I&S (10989)
Explores end-of-life care and develops the skills necessary to provide respectful care in a collaborative, team setting to patients and families living with serious life limiting illness during the last 6-12 months of life. Prerequisite: permission of course coordinator. Offered: jointly with FAMED 546.
Farber Th 6:00 - 9:00 pm T531

Medical Ethics & Jurisprudence (3) (10990)
Examines the relationship between bioethics and law. Reviews the basic concepts of both disciplines; their theoretical and practical connections. Analysis of principal legal cases and statutes illustrating such issues as informed consent to treatment, foregoing life support, research with human subjects, confidentiality, and allocation of health care resources. Offered: jointly with LAW H 503.
Dudzinski/Kuszler T Th 11:00 - 12:20 pm LAW 212-213

Advanced Qualitative Methods (4) (10993)
Examines and compares phenomenology, discourse analysis, and grounded theory. Reviews the history of ideas and critically reads examples of published articles to appreciate how each method frames questions and produces different analyses.
Starks W F 1:00 - 2:50 pm SOCC 309

Ethics in a Clinical Context (2) (10994)
Introduces the tools of clinical ethics in the context of case studies drawn from specific medical specialties. Focuses on ethical issues in clinical cases; special emphasis on understanding perspectives of clinician, patient, and trainee. Credit/no-credit only.
Webster/Strote/Edwards T 5:30 - 7:20 pm T550

Master's Research Project ([1-12]-, max. 12) (10995)
Research project culminating in a scholarly paper suitable for publication in a peer-reviewed journal. Credit/no-credit only. Majors only.
