

BOOSTER MODELS AVAILABLE FOR PURCHASE

(Revised 1/31/01)

Important Note: The National Highway Traffic Safety Administration recommends booster use until a child is at least 80 lbs. and 57 inches tall.

An * indicates that this seat is sold with a harness. When the child is 40 pounds, these seats can be converted to a belt-positioning booster by removing the harness and using the seat with the vehicle lap and should belt.
