

CCEP FELLOWSHIP

University of Washington
Seattle, Washington

Description of Program:

The Training Program in Clinical Cardiac Electrophysiology is designed to prepare men and women for an academic career of excellence in clinical cardiac electrophysiology patient care, electrophysiology procedures, research and teaching. Our program's educational goals and objectives reflect ACGME requirements for accreditation (www.acgme.org) that address each of the 6 competencies. In addition, our program is aligned with the Heart Rhythm Society Guidelines for Training in Clinical Cardiac Electrophysiology (<http://www.hrsonline.org>).

The core of our program is an intense 12 month experience dedicated primarily to clinical training. Applicants must have satisfactorily completed three years of a Clinical Cardiovascular Disease Fellowship. We also require a year of introductory clinical electrophysiology experience prior to beginning the CCEP fellowship year. We offer this prerequisite year of clinical experience to qualified applicants applying for the CCEP Fellowship.

The maximum number of fellows in the ACGME CCEP Program is 2 fellows per year of training.
