

## CCPH E-News: February 2005

Dear Colleague,

Below are highlights for Community-Campus Partnerships for Health (CCPH) in the month of February. We hope this helps you stay better connected to our events and activities.

### NEW AT CCPH

\* **CCPH's 8th Summer Service-Learning Institute will be held June 17-21, 2005** in the Cascade Mountains of Washington State. Combining the best of CCPH's past introductory and advanced institutes, this summer's institute features two tracks designed to meet the needs of both novice and experienced service-learning practitioners. For details, visit <http://depts.washington.edu/ccph/servicelearning.html>. To receive an application by email, please send your request to [ccphuw@u.washington.edu](mailto:ccphuw@u.washington.edu).

\* **Improved Partnership Matters newsletter.** Based on the many responses we received to last year's reader survey and the efforts of editor Annika Robbins and webmaster Kat Ascharya, we have made what we hope are significant improvements to the format and content of the newsletter.

- Now in HTML format- allowing you to easily scan each issue and link directly to resources that interest you.
- No longer password protected- CCPH members will continue to be notified of new issues as they are posted on the website every other Friday, ensuring members receive the information in a timely manner.
- Listings for upcoming conferences, funding opportunities, calls for papers and other time-sensitive items will remain up on the website until the deadline has passed

To access previously published issues of the newsletter, visit <http://depts.washington.edu/ccph/guide.html#PartMatters>

\* **CCPH has been invited to join the National Institute of Mental Health's Outreach Partnership Program.** The program's objectives are to improve the identification, diagnosis, and treatment of mental illnesses, and alleviate the effects of co-occurring alcoholism and other substance abuse among all Americans.

As a national partner in the program, CCPH and NIMH will be working over the coming months to identify areas and opportunities for collaboration. If you are involved in service-learning, community-based participatory research or other community-campus partnerships that address mental health issues, we would like to hear from you about your work and any ideas you may have for how CCPH and NIMH could help to support and strengthen your efforts.
