C. Research Support. List selected ongoing or completed research projects (federal and non-federal support).

Ongoing Research Support

Centers for Disease Control and Prevention, 2002-2006

Title: Poder es Salud/Power for Health

The goal of *Poder es Salud/Power for Health* is to increase the capacity of members of the African American and Latino communities in Multnomah County, Oregon, to identify and address health issues

Role: Principal Investigator

National Institute of Environmental Health Sciences/National Institute for Occupational Safety and Health, 2004-2008

Title: Promoting the Occupational Health of Indigenous Farmworkers

This project develops community-based strategies to improve the capacity of migrant farmworkers who speak indigenous languages and to increase their access to economic, health, and social services.

Role: Environmental Scientist and Co-investigator

Portland State University Center for Academic Excellence, 2006-2007

Title: Infusing an International Air Quality Improvement Demonstration Project in Chiang Mai, Thailand

The project will work with city officials in Chiang Mai, Thailand to improve air quality by reducing the burning of yard debris, and will support related policy development.

Role: Co-Principal Investigator

Completed Research Support

Oregon Health and Science University School of Nursing, 2003-2004

Title: Center for Health Disparities Research

The purpose of the Center for Health Disparities Research is to create community-based research programs to investigate the needs of Oregon's minority and underserved communities.

Role: Steering Committee Member

National Association of County and City Health Officials, 2002-2004

Title: Multnomah County Health Department's Protocol for Assessing Community Excellence in Health

Research seeks to demonstrate the association between exposure to physical environmental stressors such as contaminated air and water, lead contamination in older housing stock, brownfields and negative health outcomes in Multnomah County residents.

Role: Environmental Health Assessment Coordinator

Departmental Engagement Project Grant, Portland State University Center for Academic Excellence, 2001-2002

Project aims to build service-learning capacity of PSU School of Community Health graduate and undergraduate programs

Role: Co-Principal Investigator

W.K. Kellogg Community Health Scholar Program, 2000-2001

Addressed environmental and social inequity in rural North Carolina using a community-based participatory approach to develop research and intervention programs

Role: Postdoctoral Research Fellow

Environmental Protection Agency and the National Institute of Environmental Health Sciences, University Of Michigan Center for the Environment and Children's Health, 1998-2000

Worked with community-based participatory model and an interdisciplinary research team to identify and ameliorate environmental, policy, and individual factors that contribute to childhood asthma

Role: Research Assistant

World Health Organization, International Asthma Council (IAC) Guidelines Implementation Project, 1998

Researched and co-wrote WHO IAC guidelines implementation document for asthma prevention and treatment in less developed countries; project funded by WHO

Role: Research Assistant

Centers for Disease Control and Prevention, Urban Research Center and Village Health Worker Project, 1996-1999

Assisted with implementation of lay health advisor program designed to improve maternal and child health in Detroit, Michigan

Role: Research Assistant
