

Introduction	
 Sovaldi (Sofosbuvir) approved for treatment FDA on December 6th 2013 	of chronic hepatitis C by the US
 This drug is a cure for an otherwise incurable 	condition
Initial cost	
 \$1,000 per pill or \$84,000 per 12-week course 	
 Cost-effectiveness at list price (compared to \$12,825 per QALY gained (Najafzadeh M. et al. Ann \$55,400 per QALY gained (Chhatwal J. et al. Ann In "Highly" cost-effective 	pre-launch standard of care) n Intern Med 2015) tern Med 2015)
 Budget impact for treating all eligible hepatiti \$65 billion (2014 \$US) (Chhatwal J. et al. Ann Intern \$16 billion in cost offsets 	is C patients in the US in <u>5 years</u> Med 2015)
UNIVERSITY of WASHINGTON	DEPARTMENT OF GLOBAL HEALTH

	CEA	BIA
Objective	Quantify net health ROI	Quantify impact on resource consumption
Outcomes	Net health benefits, net resource consumption	Net resource consumption
Perspective	Societal, healthcare sector, payer	Payer
Time horizon	Long-term (until all costs and benefits realized)	Budget cycle (1 – 5 years)
Unit	ICER	Absolute costs and savings
Interpretation	↓ICER = ↑Cost-effectiveness	↓Cost = ↑Affordability
Threshold	ICER—WTP threshold	No metric or threshold for individual intervention assessment
