

CFAR HIV ASSOCIATED MALIGNANCIES CORE SEMINAR

A MULTI-DISCIPLINARY APPROACH TO OPTIMIZING AND ADVANCING CANCER CARE FOR PEOPLE LIVING WITH HIV

Thursday, July 11, 2019

4:00p- 5:00p - CFAR Seminar

Seminar location:

Fred Hutch

Pelton Auditorium

1100 Fairview Ave N, Seattle, WA 98109

Live Webcast!

ELIZABETH YU CHIAO, MD, MPH

PROFESSOR OF MEDICINE-INFECTIOUS DISEASE
BAYLOR COLLEGE OF MEDICINE
DAN L DUNCAN COMPREHENSIVE CANCER CENTER

Dr. Chiao's research interests include the study of virally associated malignancies, particularly HPV-associated cancers, and the prevention, diagnosis and treatment of HIV-associated cancers. The principal focus of her HPV-related work has been on identifying the improved screening algorithms utilizing HPV tests for HPV-related pre-cursor disease. In particular, she and her group are interested in identifying cost-effective approaches for screening HIV-infected individuals, who are at high risk for HPV-related cancers. She and her collaborators are focusing on providing evidence-based data to support risk-based approaches for screening and prevention guidelines for prevention of HPV-related cancers in high-risk individuals.
