Training Useful Links

Dolan DNA Learning Center, Cold Spring Laboratory
The Dolan DNA Learning Center (DNALC), which is an operating unit of Cold Spring Harbor Laboratory, aims to serve as a clearinghouse for information on DNA science, genetic medicine, and biotechnology; to provide an interactive learning environment for students, teachers, and nonscientists; to explore and develop new instructional technologies; to train educators for laboratory-based teaching in genetics; to extend enrichment activities to underserved populations; and to provide a forum for public discussion of personal, social, and ethical implications of DNA science.

Human Genome Project Information
http://www.ornl.gov/TechResources/Human_Genome/home.html
This site provides information about the U.S. and worldwide Human Genome Project, a 13-year effort coordinated by the Department of Energy and the National Institutes of Health that began in 1990.

Institute for Public Health Genetics
University of Washington School of Public Health and Community Medicine
The University of Washington Institute for Public Health Genetics (IPHG) was established in 1997 with funding from the University Initiatives Fund. The mission of the Institute is to provide broad, multidisciplinary training for future public health professionals, to facilitate research in public health genetics, and to serve as a resource for continuing professional education.
