

Department Resources – Department Policies & Procedures – Facilities & Research: POLICY - First Aid and Safety Training

First Aid and Safety Training are required for some Department of Chemistry faculty, staff, and students. The requirement is based on compliance with UW Administrative Policy Statement 10.5: First Aid Training and Certification Requirements (<http://www.washington.edu/admin/rules/APS/10.05.html>).

The following First Aid and Safety training classes are REQUIRED by the Department of Chemistry. Failure to attend will result in confiscation of lab keys and building permits until the classes have been taken.

Faculty:

- First Aid and CPR Certification
- Managing Laboratory Chemicals and Spill Clean-up
- Compressed Gas Safety
- Fire Extinguisher Training
- Floor Warden/Building Evacuation Training
- Lab Safety Standard Compliance

Staff:

- First Aid and CPR Certification (Supervisors only)
- Floor Warden/Building Evacuation Training

Students/Researchers:

- First Aid and CPR Certification
- Managing Laboratory Chemicals and Spill Clean-up
- Compressed Gas Safety
- Fire Extinguisher Training

In cases of repeated chemical spills and/or other laboratory safety hazards, researchers may be required to re-take Managing Laboratory Chemicals and Spill Clean-up and/or other classes as deemed necessary by the Department of Chemistry Health & Safety Officer.

Information on Environmental Health & Safety training classes is available at <http://www.ehs.washington.edu/training/corsdesc.htm>.
