COURSE DESCRIPTION

This is the 37th year that the Department of Family Medicine at the University of Washington School of Medicine is offering five days of educational opportunities for everyone involved in primary care.

Each year we strive to provide new information regarding etiology, diagnosis, and management in a variety of general medicine areas including women's and children's healthcare. As in the past, the topics for the course were chosen with three selection criteria in mind:

- *Suggestions from previous course attendees*
- *Areas where substantial changes have taken place during the past three years*
- *Controversial subjects where medical opinions differ*

COURSE OBJECTIVES

At the conclusion of this activity, participants should be able to:

- *Discuss new innovations and best practices in primary care practice and apply them to patient care*
- *Collate and integrate current data in the areas of adult medicine, geriatrics, pediatrics, obstetrics, women's health, orthopaedics, sports medicine and psychiatry in order to reach appropriate treatment decisions*

We have attempted to arrange the plenary sessions and workshops to help you tailor the week to your educational needs.

For additional flexibility, a three-day attendance option is available.
