

I am seeking an outstanding student to pursue a graduate degree at either the MS or PhD level in watershed sciences. The student will conduct intensive water quality sampling in Central and South Louisiana. Minimal qualifications include a background in water quality or a similar discipline (e.g. hydrology, soil science, environmental chemistry, environmental toxicology, etc.). A strong work ethic, good academic record and evidence of excellent writing and quantitative skills are critical. The student must possess a valid U.S. driver's license.

Interested candidates should send an email describing their motivation and research interests, along with a resume, unofficial college transcripts, GRE scores, and the names and contact information for three references to: yjxu@lsu.edu. Applications missing any of the above items will not be considered. Review of applications will begin immediately and continue until the position is filled. Start date can be as soon as the summer semester of 2014.
