

The Aquatic Ecology Laboratory at Washington State University Vancouver, directed by Dr. Stephen Bollens and Dr. Gretchen Rollwagen-Bollens, has one paid position available for a new graduate student to contribute to a growing and dynamic program in Aquatic Ecology.

This graduate position is specifically oriented around research in the ecology and potential impact of invasive species in the Columbia River Basin, with particular emphasis on invasive zooplankton.

The successful graduate student will be supported on Teaching Assistantships and/or Research Assistantships, plus full tuition waivers.

We are currently accepting applications to begin study in August 2014.

Degree programs and application deadlines: M.S. in Environmental Science. For August 2014 admission, please apply as soon as possible, but no later than June 15, 2014. There is potential to continue on to a Ph.D. in Environmental Science depending on progress and availability of funding.

Campus and Facilities: Washington State University Vancouver is one of four campuses in the WSU system, and is a rapidly expanding institution located within the greater Portland, OR/Vancouver, WA metropolitan area, near the Columbia River, Cascade Mountains and coastal ocean. The 351-acre campus offers new, state-of-the-art classroom and research facilities, where teaching and research are conducted in an interdisciplinary and collaborative atmosphere.
