

**IT/Web Specialist 2** – AquaFish Innovation Lab at Oregon State University invites applications for a full-time (1.0 FTE), 12-month, fixed-term IT Web Specialist 2 position. Please apply at <http://oregonstate.edu/jobs/>, posting #0012697. **Closes on July 21, 2014.** OSU is an AA/EOE/Vets/Disabled.

The IT Web Specialist 2 position will lead specialized information and communications technology and web development activities for AquaFish in support of the Unit's mission and in consultation with the Director and Management Office staff. This position will administer the AquaFish website and be directly involved in the design and development of new and forward-looking web-based features including secure online reporting and database management. This position will also serve as a subject matter expert for the Unit, providing advice and training on information and communications technology systems and web-based tools (including databases), especially as they pertain to aquaculture, fisheries, and international development.

**Appointment Type**

Administrative/Professional Faculty

**Job Location**

Corvallis, OR

**Position Summary**

AquaFish Innovation Lab at Oregon State University invites applications for a full-time (1.0 FTE), 12-month, fixed-term Information Technology (IT) Web Specialist 2 position. Reappointment is at the discretion of the Department Head.

The IT Web Specialist 2 position is under the Feed the Future Innovation Lab for Collaborative Research on Aquaculture & Fisheries (AquaFish) at Oregon State University. AquaFish is a multinational, multi-institutional, and multidisciplinary program operating under an award from the United States Agency for International Development (USAID). Its work is performed through a partnership of researchers, located at US universities and overseas institutions, who focus on improving sustainable aquaculture and fisheries.

Oregon State University serves as the Management Entity (ME) of AquaFish with scientific, programmatic, and financial leadership for the performance of grant provisions. ME technical and programmatic activities at OSU are carried out by a Management Office, in support of the Director and PI. More information is available at <http://aquafish.oregonstate.edu>.

The IT Web Specialist 2 position will lead specialized information and communications technology and web development activities for AquaFish in support of the Unit's mission and in consultation with the Director and Management Office staff. The incumbent will build upon the existing AquaFish Innovation Lab websites to optimize functionality towards achieving the Unit's stated international development, information dissemination, and research management goals. This position will administer the AquaFish website and be directly involved in the design and development of new and forward-looking web-based features including secure online reporting and database management. This position will also serve as a subject matter expert for the Unit, providing advice and training on information and communications technology systems and web-based tools (including databases), especially as they pertain to aquaculture, fisheries, and international

development. The IT Web Specialist 2 may be required to travel to meetings, workshops, and trainings and will be required to maintain confidential information (including user names, passwords, personal information, etc). This position will report directly to the Administrative Officer.

**Minimum/Required Qualifications**

Bachelor's degree in a field related to IT / computer science, or other science or technology.

Highly organized and detail oriented, with attention to quality control.

Ability to prioritize and work on multiple tasks to meet both short and long-term deadlines.

Effective written, verbal, and interpersonal communication skills.

Ability to work effectively in a team environment with diverse users to assess their needs and communicate technology solutions.

Proficient in multiple programming languages and content management systems (e.g., PHP, MySQL, Drupal, WordPress, etc.)

Demonstrated experience in design and development of integrated website and relational database systems with customized online forms, user access regulation, and security. Applicants who are invited to interview for this position will be asked to provide specific examples of web-based database systems.

**Preferred (Special) Qualifications**

Experience working in a research environment.

International development experience.

A demonstrable commitment to promoting and enhancing diversity.

Global perspective of web interfaces and experience creating output for users from diverse cultures, especially for an international audience.

Experience working with USAID or other Federal, State, or private donor agencies.

**Posting Date**

06-30-2014

**Closing Date**

07-21-2014

**Recommended Full-Time Salary Range**

Salary is commensurate with education and experience.
