

Two MS and two PhD Research Assistant positions are available at Ball State University (BSU), Muncie, Indiana. Students will join federally-funded collaborative research projects studying emerging contaminants in aquatic ecosystems in conjunction with ongoing research in the laboratory of Dr. Melody Bernot (www.mjbernot.iweb.bsu.edu/index.htm) in the Department of Biology. Doctoral students would join the BSU interdisciplinary PhD Environmental Science program (<http://cms.bsu.edu/academic/collegesanddepartments/environmentalscience>).

Graduate Research Assistantships are available beginning January 2015. Interested students should contact Melody Bernot (mjbernot@bsu.edu) for additional information and to discuss individual research interests. Students should apply to Ball State University by November 1, 2014 for full consideration. Details on the application process can be found at <http://cms.bsu.edu/Academics/CollegesandDepartments/GradSchool.aspx>.
