

Postdoctoral Position in Atmospheric Chemistry Modeling/ Harvard University. A postdoctoral position is available in the Atmospheric Chemistry Modeling Group at Harvard University (visit us at <http://acmg.seas.harvard.edu/>). The successful candidate will have the opportunity to work on a wide range of atmospheric composition problems including statistical and inverse model analyses of satellite and aircraft observations; global budgets of methane, oxidants, aerosols, halogens, and mercury; regional- and global-scale air quality; and numerical methods for atmospheric models. Applicants should have a Ph.D. in atmospheric chemistry or related field. Please email a curriculum vitae, contact information for three references, and 1- paragraph statement of interest to Prof. Daniel J. Jacob (djacob@fas.harvard.edu), School of Engineering and Applied Science, Harvard University. Harvard University is an equal opportunity / affirmative action employer.
