Assistant Professor Position in Coastal Biology

The Department of Biology (<http://biology.ucla.louisiana.edu>) at the University of Louisiana, Lafayette seeks to fill a tenure-track position at the Assistant Professor level to complement our strengths in marine and coastal biology. Ideally, the candidate would be a Coastal Landscape Ecologist who integrates research/data across ecosystems at regional and landscape scales, particularly along coastal margins and the land-sea interface. However, we also welcome applications from Systems Biologists or other biologists working in coastal systems, as well as from Landscape Ecologists studying other systems.

Minimum qualifications are a Ph.D. in a relevant field and postdoctoral experience. Successful applicants will be expected to establish a vigorous, externally-funded research program, provide instruction to undergraduates and participate in our Ph.D. program in Environmental and Evolutionary Biology. Cover letter, curriculum vitae, statement of research interests, statement of teaching interests, and a list of three references (including postal and email addresses) should be emailed as a single pdf attachment to: coastalbiology.search@louisiana.edu. Please refer to Coastal biology search in the subject line.

Review of applications will begin on December 1, 2014.

UL Lafayette is an EEO/AA employer.
