

Green Mountain College is seeking adjunct faculty to teach in its Master of Science in Environmental Studies. Currently we are filling positions for an Ecology course beginning January 7th 2015, and a Biogeography course beginning April 14 2015. Course descriptions can be viewed on the Green Mountain College website, under Graduate Programs.

*The courses are all taught in 6 week blocks and class size is limited to 20 students. Because the quality of these courses depends heavily on student interaction with the instructor, daily presence minimum of 5 days per week and serious engagement of the material with students is expected.

Compensation is \$3,000.00 for the course. Please send cv and a brief letter of interest to Meriel Brooks, Program Director, at brooksm@greenmtn.edu. Inquiries from those who might wish for more information is welcome. *
