## University of Idaho - Tenure-Track Position

The Department of Geography at the University of Idaho is seeking to fill a tenure-track position beginning August 2015 at the level of Assistant or Associate Professor with a research expertise that emphasizes the interaction of climate change, society, and the environment. Candidates must have demonstrated research expertise in climate impacts, adaptation, or mitigation commensurate with time since Ph.D., as well as potential for or demonstration of high-quality teaching of courses that will complement the broader Geography discipline and contribute to the department minor in Climate Change.

The successful candidate will join a department with GIS Certificate, BS, MS, and PhD programs and department research expenditures over \$1M per year. The new hire will be encouraged to contribute to an active community of transdisciplinary climate-related research at the University of Idaho. Preference will be given to candidates with research experience and goals that complement existing strengths in spatial statistics, remote sensing, climate science and impacts, human-environment geography, and political and economic geography. Our location in the small town of Moscow, Idaho in the beautiful Inland Northwest provides for high quality of life and was recently ranked among the top 10 college towns in the US. Washington State University is 8 miles away and provides additional opportunities for collaboration.

Review of applications will begin on November 10, 2014. For additional details on required and desired qualifications and procedures for applying, please see <http://bit.ly/1ufwDug> or contact John Abatzoglou, [jabatoglou@uidaho.edu](mailto:jabatoglou@uidaho.edu).
