

Paid Internships

myActions is thrilled to announce the **Second Annual Campus Challenge** to engage students and deliver real world impact of green, caring, and healthy actions. Last year 75 universities participated, driving over 100,000 sustainable actions on campus and in local communities. Based on strong and measured success, we are expanding the program and resources for this school year.

On Campus Roles

To best support students and campus initiatives, we are creating a national network of student leaders and are **accepting applications for two paid internships** at University of Washington, Seattle.

- **Sustainability Campus Intern** | [Role Description](#) | [Application](#)
- **Community Service Campus Intern** | [Role Description](#) | [Application](#)

Our team supports these student leaders with technology, tools and skills development to raise student awareness of and participation in existing campus programs while also collaborating with other campus leaders to create new programs and events.
