David L Nieland

Subject:

Ph.D. & M.S. opportunities in landscape ecology at Texas Tech

Ph.D. & M.S. opportunities in landscape ecology

I am seeking 1-2 graduate students to join my lab who are interested in landscape ecology pertaining to potential climate and land-use change impacts on odonates (dragonflies and damselflies). For more information about research done in my lab, please check out my webpage at: http://www.biol.ttu.edu/faculty/nmcintyre/default.aspx.

Preference will be given to students with previous experience in GIS or remote sensing, and to Ph.D. students who already have a Master's degree.

Prospective students will be funded (upon qualification) by a 9-month/year departmental Teaching Assistantship and possibly by applicable graduate school fellowships (awards ranging from \$2500 for 1 year to \$30,000/yr for 3 years).

To apply, please send your Curriculum Vitae, which should include all of the following items:

- * a statement about your research interests and how they are compatible with the kinds of research that I do
- * a statement about your career goals
- * GRE scores
- * a brief list of your academic and professional accomplishments (degrees, GPA, awards, fellowships, publications, grants, presentations at professional meetings, jobs, etc.)
- * the names, addresses, phone numbers, and email addresses of 3 references

Students from outside the U.S. must also include TOEFL scores (Test of English as a Foreign Language), if appropriate.

See http://www.depts.ttu.edu/gradschool/admissions/international/gradindex.php for more information for international students, and http://www.depts.ttu.edu/gradschool/admissions/domestic/index.php for more information for U.S. citizens.

Funds may be available to bring prospective students in for a campus visit.

Application deadline: 1 December 2014.

Nancy McIntyre, Ph.D.
