

The Department of Earth and Environmental Sciences at the University of Rochester will be hiring a tenure-track faculty in Global Climate Modeling / Earth Systems Modeling / Global Biogeochemical Modeling. The rank of the position is open, with a start date of July 1, 2016. We are interested in a dynamic researcher and educator who can establish an externally funded, internationally recognized research program. The Department and University are committed to growth in the broad area of Climate Science, with two recent faculty hires, and several further hires projected over the next few years. The successful candidate will have an opportunity to link with the new Institute for Data Science and have access to the University's state-of-the-art supercomputer and visualization center. The University of Rochester is a highly ranked research university, and Rochester's cultural, educational, and recreational assets consistently place the city in the top 10 places to live within the U.S. Applicants should submit materials via: <https://www.rochester.edu/faculty-recruiting/>. Materials include a curriculum vitae, select reprints, statements of research and teaching goals, and the names and contact information of four references. The review of applications will begin December 20, 2014 and will continue until the position is filled. The University of Rochester has a strong commitment to principles of diversity and, in that spirit, actively encourages applications from groups underrepresented in higher education.
