

Position Announcement: Sustainability Science Concordia College, Moorhead, MN

Concordia College, Moorhead, MN invites applicants for a tenure-track position in Sustainability Science. Candidates should have a Ph.D. in Sustainability, Environmental Science, or related field. Dissertation or current research focused on sustainability, regardless of field, is preferred. In addition to introductory courses in Ecology, Biology, and Environmental Science, there will be the opportunity to teach the senior research seminar for the Environmental Studies Program and develop courses in the candidate's area of research. The normal teaching load is three courses per semester. The occupant of this position will be the first recipient of an annual course release in order to enable the person to take an active role in providing leadership for sustainability on campus through the creation of experiential and/or applied learning opportunities. The specific responsibilities will be tailored to the interests and expertise of the successful candidate. This is an exciting new position designed for someone who has a passion for innovative, cross-campus education for sustainability. The position will be housed in Biology, with teaching responsibilities in both Environmental Studies and Biology. The occupant of the position will serve as a key member of the Environmental Studies Program. The departments value diversity and encourage applications from historically underrepresented individuals, including women, veterans, persons of color, and persons with disabilities. We welcome applicants who can contribute to our goals to support diversity.

Concordia College is dedicated to undergraduate teaching. Demonstrated excellence in teaching and an enthusiasm for working with undergraduates is essential. In addition to teaching, the successful candidate will also develop an active research program involving undergraduates. Undergraduates at Concordia College typically present their research at regional and national meetings and are encouraged to publish their results in professional journals. Both the Biology Department and the Environmental Studies Program consist of a group of vibrant and dynamic faculty. The successful candidate will enter into a welcoming, student-centered environment with rich opportunities for professional growth.

Concordia is a selective Lutheran (ELCA) liberal arts college of 2500 undergraduates located in the growing and dynamic Fargo-Moorhead metro, a community of over 220,000 people located at the border of Minnesota and North Dakota. Opportunities abound in the area for arts, culture, and outdoor recreation. The metro is an educational hub, with three other institutions of higher education.

Concordia College is an equal opportunity employer, committed to diversity of students, staff, and faculty. The employment start date is August 2015.
