

Adjunct Instructor - Oregon Institute of Marine Biology

The University of Oregon's Institute of Marine Biology maintains a pool of applicants for temporary instructional positions during the Institute's spring and summer session. For spring of 2015 we are searching for applicants to teach an 11-week Animal Behavior course. For summer 2015 we are interested in applicants to teach an eight-week Biology of Fishes course and an eight-week Marine Ecology course. Other areas occasionally needed are biology of marine birds and mammals, invertebrate zoology, parasitology, marine botany, and biological illustration. Courses may be taught in other terms of the year. Positions are limited duration appointments potentially renewable for up to a total of three years. In limited circumstances, there is the possibility of renewal beyond three years based on programmatic need, funding and performance. Applications will be accepted on a continuous basis and pool will remain active through October 31, 2015. Screening of applications will take place as positions become available and continue until positions are filled. A Ph.D. with strength in marine biology is required for all positions with the exception of the biological illustration course where experience teaching biological illustration is desired. Information on the Institute's spring and summer session is at www.uoregon.edu/~oimb

To apply, send curriculum vitae and names of three references to:
