

A postdoctoral position in chemical transport modeling and emissions inventory development is available at the Air Quality Forecasting group at the University of Houston headed by Dr. Yunsoo Choi. Expected qualifications include extensive experience using SMOKE and model development using the CMAQ model. Experience using the PMCAMx model is desired but not necessary.

Interested applicants may send a copy of their CV to Dr. Yunsoo Choi (ychoi6@uh.edu) at the Department of Earth and Atmospheric Sciences at the University of Houston.

Additional details about Dr. Choi and his group are available online at the websites below:
