

USGS in Moab UT is seeking to a student intern to assist with a variety of ecosystem ecology research projects. The incumbent will gain valuable experience conducting basic ecology field work and building a large global change experiment under the supervision of USGS ecologists and technicians. The primary study sites are located near Canyonlands National Park. Pay is \$12.01 an hour. Housing will be provided in the Needles District of Canyonlands National Park and/or the Canyonlands Research Center (<http://www.canyonlandsresearchcenter.org/>).

Position will remain open until filled. Preferred start date is mid-February and the position will go through mid-June, with a possibility of extension through the summer depending on work load.

Applicants must be at least 18 years of age, possess a valid driver's license, and must be a current student or recent graduate (less than 12 months out of school). Prior research experience and construction-related skills preferred. To apply, please send a resume, three references and copy of transcripts to CRS_Jobs@usgs.gov.
