

Position – Field Ecologist & Construction Crew Member

Marek Landscaping, LLC is a design-build company founded in 1996 that provides sustainable design & construction services using low-impact design methods for native aquatic, riparian, upland, and woodland restorations, shoreline stabilizations, storm water and erosion control best management practices, multi-use trails, parks and landscapes. We also develop and implement land management plans for these projects ensuring long-term health and viability. Current projects include bluff, shoreline, and wetland restorations for large public projects, non-for-profits, and private residences.

We are currently seeking a field ecologist to:

-Conduct:

- Native habitat restoration projects including tree and brush cutting and removal, planting, seeding, soil preparation, and erosion control material installation

- Invasive plant species control

- Prescribed burns

- Operate skid steers, compact excavators, tractors, power tools, and other specialized equipment.

- Assist in management of native habitat stewardship projects and budget.

- Maintain and repair equipment.

- Will also participate on landscaping hardscape and softscape projects including storm water, planting, seeding, soil preparation, and erosion control material installation.

Qualifications:

- BS in ecology, fisheries, natural resource management, environmental science, or biology.

- Knowledge of local plant taxonomy.

- Ability to read, understand, and communicate landscape plan drawings and specification documents.

- Experience operating skid steers, compact excavators, tractors, power tools, and other specialized equipment.

- Prescribed fire training (S-130, S-131, S-190, 2-290, S-234).

- Class A CDL license w/tanker endorsement or ability to obtain license within first month a plus.

- Agricultural background a plus.

- Wetland delineation experience a plus.

Please send cover letter and resume to info@mareklandscaping.com. Thank you!
