

The Northwest Entomological Research Center is recruiting for 8 open field crew/undergraduate research internships for the summer 2015 field season.

Take part in on-going research in Western Oregon learning about insects, ecology, and field studies while gaining hands-on experience.

Position length: May 1 – August 31 (some positions available for June-August only)

Job Requirements:

Interest in Entomology (a MUST!)

Able to navigate rough terrain

Able to carry up to 30lbs

Must have valid driver's license

Preference for upperclassmen and applicants with field work experience

NWERC will work with your home institution for internship credit, all positions are paid

Internships provide hands-on, industry and NGO experience for young professionals in “real-time science” in the fields of:

Entomology

Natural Resources

Conservation Science

Organismal Biology

Ecology

Ecosystem-based field studies

Interns gain proficiency in:

Invertebrate identification methods

Study Design for multiple project types

Field sampling methods and equipment

Data Collection

Ecological monitoring

Database management

Insect population monitoring

Industry-specific protocols

Professional Presentation

All questions and applications must be e-mailed to Melissa Scherr, Program Director: mascherr.ent@gmail.com

To apply:

Send a cover letter addressing job requirements listed above, your most current Curriculum Vitae or resume, and a list of THREE references to Dr. Scherr (e-mail above).

Application deadline is March 6th, 2015.
