

Position – Summer Insect Ecology Research Internship, University of Wyoming Plant Sciences Department (Laramie, WY)

Seeking motivated, enthusiastic **undergraduate** student who wants to gain research experience. Mid-May to Mid-August, **full-time paid position** (\$10-12/hour depending on experience and qualifications). Projects will combine field surveys, laboratory work, and development of outreach materials related to pest management in alfalfa and wheat. Position will be based at University of Wyoming Plant Sciences department in Laramie, WY, with travel required throughout WY. Laramie is located near beautiful recreation areas (hiking, climbing, etc.) and is a great place to spend the summer. This position does not provide housing, however there are many summer sublet rentals available close to campus.

Required: Driver's license; availability 40 hours M – F 8am-5pm; willingness to work outdoors in sunny, hot, difficult conditions; willingness and interest in working with insects; ability to work independently, with attention to detail, and communicate effectively; basic computer skills.

Preferred: Major related to agriculture or life sciences; previous coursework or research experience in entomology; interest and enthusiasm for developing well-designed outreach materials for agricultural producers (includes written, video, and web-based materials).

To apply, submit cover letter explaining why you want the position and a resume to Randa Jabbour at rjabbour@uwyo.edu. **Phone interviews begin first week of April.**
