

## **Position – Field Botanist, WestLand Resources, Inc., Tucson, AZ**

WestLand Resources, Inc. (WestLand) is an Environmental and Engineering consulting company that conducts biological surveys across southern Arizona. WestLand has several positions available for **part time field botanists** to assist with plant surveys for a number of native plant species that occur in the Sky Island Mountains of southern Arizona.

WestLand is seeking applicants with majors in biology, botany, natural resources, or related areas who have course work and/or field experience appropriate for native plant surveys in southern Arizona. Field botanists will be part of a team led by an experienced botanist. Candidates must have demonstrable plant identification skills with native species in southern Arizona, but species-specific training will also be provided. Fieldwork requires good physical fitness and the ability to hike in rough terrain and hot weather under challenging conditions at times.

Work will be based out of Tucson, Arizona. Candidates should be available to **start work in mid-August, and be available through the end of September.**

WestLand is an equal opportunity employer and all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, national origin, disability status, protected veteran status, sexual orientation, or any other characteristic protected by law. We maintain a drug-free workplace and perform pre-employment substance abuse testing.

Please submit a resume with a detailed description of previous work experience, references, and a cover letter to WestLand Resources Inc., 4001 E. Paradise Falls Dr. Tucson, AZ 85712 Attn: Shawn Reeder or email: [\*\*sreeder@westlandresources.com\*\*](mailto:sreeder@westlandresources.com)
