INDUSTRIAL PROCESS PRODUCTS & TECHNOLOGY

- **Precision Spray Control**
- **Improving Control Valve Reliability**
- **OPC Transitions to a Unified Architecture**

Analytic Sampling:

NEW DIRECTIONS IN MODULARITY

**Steam: The Energy Fluid Part 2
The Steam & Condensate Loop**

Emerson Process Management's gas analyzer makes continuous measurements using an (NDIR)-based measuring cell.
Circle 111 see page 14

Alpha's HygroClip M2 Humidity / Temperature transmitter combines advanced probe technology with a robust design.
Circle 242 see page 31

Oetiker's Swing Coupling is designed to interchange with most plug systems, providing a universal connection.
Circle 201 see page 25

Wieland Electric's pluggable, PCB spring clamp terminal strips accommodate increased pitch applications.
Circle 282 see page 36

Missing Image RS141

ASCO offers a comprehensive selection of solenoid operated valves in brass, stainless steel, aluminum and plastic.
