The Crosley Poll

Even If Everyone Votes, Tie Is Best

Truman May Get

By Arnold M. Cowley

NEW YORK, Sept. 18—If every potential vote in the
United States should cast a ballot in election day—wider
sweep than any sweeps ever undertaken to date by
the Federal Government—this is what the Crosley
Poll, based on a sample of 2,000, shows for the three
presidential candidates:

Truman—52 per cent

Dwight—39 per cent

Eisenhower—19 per cent

The figures were compiled by the Cincinnati-based
firm of Kohn, which conducted the poll under the
auspices of the National Committee for the Election
of President Truman. The poll was taken at random
across all regions of the United States, including
rural and urban areas.

The results are not expected to change significantly
the outcome of the election, but they do suggest that
Truman may have an edge in the final tally.

Truman Hits 'Smears'

Against U. S. Scientists

WASHINGTON, Oct. 18—President Truman in his
State of the Union address on January 20 has warned
U. S. scientists to beware of "smears" and to carry on
their work undeterred by public criticism.

Truman, in a speech to the American Physical Society
in New York, said that he had been subjected to "unfair
attacks" by his political opponents. He urged scientists
to continue their research and development work,
saying, "We must not allow our work to be slowed down
by the petty attacks of the opposition.

Atomic Lab Head
Quits in Protest

Over 'Red' Smear

NEW YORK, Oct. 18—The head of the Atomic
Research Laboratory, Dr. J. Robert Oppenheimer,
has resigned in protest over the "Red" smear campaigns
that have been directed at him and other scientists.

Oppenheimer, who directed the Manhattan Project,
the top-secret program that developed the atomic
bomb, said in a statement that he could no longer
serve in his position.

The resignation comes after Oppenheimer was
named as a "red" by Senator Joseph McCarthy of Wisconsin
in a series of investigations. Oppenheimer has
always denied any ties to the Communist Party.
