G.O.P. Hints Truman Has Pact With Reds

By Russ McEwan

WASHINGTON, Sept. 5—The American G.O.P. high command is hinting that it has a "secret understanding" with the communists in the United States government because a high-ranking senatorial committee has just been formed to investigate the activities of the American G.O.P. high command. The committee is headed by Sen. Robert A. Taft of Ohio, a close associate of the late President Truman.

The committee's first move was to call for the resignation of the late President Truman, who is now a candidate for the presidency in 1948. The committee said it was "concerned" with the conduct of the government during the Truman administration.

The committee's second move was to make a request for a meeting between Sen. Taft and the late President Truman. Sen. Taft is expected to accept the request, which is seen as a clear indication of the committee's determination to investigate the activities of the American G.O.P. high command.
