The University of Washington has allocated **5.5 contact hours** for this activity.

Information about Instructors

Douglas Turkington, MD is a Professor of Psychosocial Psychiatry at Newcastle University, UK. He is also a Founding Fellow of the Academy of Cognitive Therapy based at Philadelphia, USA. He originally worked as a general psychiatrist specializing in psychotic disorders and then as a liaison psychiatrist with an interest in suicide prevention and the psychoses linked to epilepsy. In 1990, along with Professor Kingdon, he developed and piloted a normalizing treatment with allied CBT techniques for use with schizophrenia. Recently published books include a manual describing how to include compassion based therapy, mindfulness and ACT within the cognitive model and a book on cultural aspects of CBT for psychosis. He is currently working on the linguistics of thought disorder and voice hearing and on developing and implementing CBT informed caring for schizophrenia with the Schizophrenia Society of Ontario.

Sarah Kopelovich, PhD is an Assistant Professor and holds a Professorship in Cognitive Behavioral Therapy for Psychosis (CBTp) in the Department of Psychiatry and Behavioral Sciences at the University of Washington. She has served as the Principal Investigator on foundation-, state-, and federally funded projects related to implementation of evidence-based treatments for psychosis. She oversees the Northwest CBTp Network, is a founding member and communications officer for the North American CBTp Network, and is core faculty for the Northwest Mental Health Technology Transfer Center.

Maria Monroe-Devita, PhD, is a clinical psychologist and associate professor in the University of Washington School of Medicine, Department of Psychiatry and Behavioral Sciences. She currently serves as Principle Investigator on several projects with the Washington State Division of Behavioral Health and Recovery and provides training and technical assistance to Programs of Assertive Community Treatment (PACT) teams in Washington state, as well as nationally. She is also co-director of the Northwest MHTTC, a SAMHSA-funded project whose regional focus is on providing support to Assertive Community Treatment teams and clinicians treating clients with serious mental illness. She is the Director of the Washington State Center of Excellence for First Episode Psychosis.
