

Room 140 Data Collection

Please collect data on the objectives listed on the data sheets for your area. Here are some tips.

The data sheet will ask you if a kid can do a certain skill. Your job is to see if that kid will do that skill. The following is an example of what the data sheet looks like.

Does he put on his coat and zip it up with some teacher help?

Criteria: once a day on 4/5 days

Prompt: Some teacher assistance

Coat On:

M	T	W	Th	F
Y	Y	Y	Y	Y
N	N	N	N	N

Zip Up:

M	T	W	Th	F
Y	Y	Y	Y	Y
N	N	N	N	N

If the kid can complete the skill as listed, circle the Y. If the kid cannot do the skill as listed, circle the N.

Some objectives require you to write down additional information such as the names of other students, words you hear kids say, etc.

It is important that we take data every day on the goals listed. Please remember to have your clipboard with you when playing with the kids. It is okay to go back after class and fill in data sheets if you forget. If you have any questions, please ask!
