Technical Guidelines: National Surveillance Standards

- Influenza and other respiratory viruses sentinel surveillance system. (March 2005)
- Severe Acute febrile Respiratory Syndrome Surveillance System (2003).

DIRECTIVA N° 057 - MINSA/OGE-V.01

"VIGILANCIA CENTINELA DE LA INFLUENZA Y OTROS VIRUS RESPIRATORIOS"

En vista del incremento sostenido de infecciones respiratorias agudas y ante la circulación de diferentes cepas de influenza a nivel mundial, la Oficina General de Epidemiología, en coordinación con la Dirección General de Salud de las Personas, han elaborado la presente Directiva.

I.

OBJETIVO

- Reforzar la vigilancia de formas graves de síndrome febril respiratorio agudo.

OBJETIVO

- Definir la vigilancia de formas graves de síndrome febril respiratorio agudo.

OBJETIVO

OBJETIVO

II.

- Considerar la vigilancia de formas graves de síndrome febril respiratorio agudo, en vista del incremento sostenido de infecciones respiratorias en nuestro país, habiéndose notificado un brote de SARS en China y ante la presencia del brote en humanos de influenza aviar AH5N1 en Vietnam y Tailandia, caracterizado por cuadro clínico grave, acompañado de alta letalidad, así como por la propagación de nuevos serotipos de influenza AH3N2 y de influenza B en los países de Europa y América, aunado al constante incremento de los viajes internacionales, lo cual favorece la diseminación del virus influenza y del coronavirus del SARS, la Oficina General de Epidemiología, la Dirección General de Salud de las Personas y el Instituto Nacional de Salud, emiten la presente Norma Técnica apuntando a fortalecer la vigilancia de formas graves de síndrome febril respiratorio agudo.

I. OBJETIVOS

OBJETIVO GENERAL

- Fortalecer la vigilancia de formas graves de síndrome febril respiratorio agudo.

PRPPPI-Peru

Goal

To lead and organize the national and regional response against a potential influenza pandemic with the purpose of diminishing its impact on public health in Peru through an effective multi-sectorial response.

REPUBLICA DEL PERU

MINISTERIO
DE SALUD

PRPPPI-Peru

Objectives

- 1. Strength intra- and inter-sectorial coordination to confront a potential influenza pandemic.**
- 2. Develop and implement containment measures to limit possible pandemic.**
- 3. Strength Preparation and response capacity of health services, for case management.**
- 4. Strength human influenza surveillance .**

REPUBLICA DEL PERU

MINISTERIO
DE SALUD

PRPPPI-Peru

Objectives (cont...)

- 5. Improve avian influenza (AI) Surveillance in domestic birds and wild birds.**
- 6. Implement mass Education, Information and Communication (EIC) strategy to ensure effective organized population response to AI and pandemic influenza(PI) threats .**
- 7. Implement Prevention and control measures through active social participation designed to tackle AI and PI**

Inventory of Core Capabilities for Pandemic Influenza Preparedness and Response

- Cooperative Agreement (US Centers for Disease Control and Prevention)
- 12 Core Capabilities:
 - Country Planning
 - Communications
 - Laboratory Capability
 - Epidemiology Capability
 - Research and Use of Data
 - Outbreak Response
 - Resources for Containment
 - Infection Control
 - Routine Influenza Surveillance
 - National Respiratory Disease Surveillance and Reporting
 - Community-based Interventions to Prevent the spread of Influenza
 - Health Sector Pandemic Response

Critical Systems:

1. Medical interventions

Activities	Achievements	To be included in the 2008 – 2011 plan
Case management	Health Workers, training at the national level	Training at the regional level. Develop HW emergency deployment policies
Medical infrastructure, medical supplies and equipment	Needs estimations completed	Implementation of Isolation rooms and ICUs.
Stockpiles	Vaccines to health personnel	Vaccines for risk groups
	Guidelines for Antiviral use	Stockpile and distribution policies
	PPE stock available for medical care, field investigations and control measures	Distribution plan for pre-location of PPE at regional level

Critical Systems:

3. Social & economic systems

Activities	Achievements	To be included in the 2008 – 2011 plan
Security and rule of law	None	Several legislation reviews, laws and regulations updates for all the activities.
School and Work absenteeism	None	
Food and water supplies	None	
Fuel and power supplies	None	Coordination with other sectors to prepare sector –wise plan in order to complete a National multi-sectorial PP and response plan
Transportation	None	
Telecommunications	None	
Financial and Banking services	None	
Compensation

Next steps

- Update de national plan, emphasizing:
 - Legislation issues
 - Other sectors involvement (SME's and others).
 - Research & Information use
 - Human resources for containment
 - Community interventions to prevent the spread of influenza.

Strengthen the “one world one health initiative”

REPUBLICA DEL PERU

MINISTERIO
DE SALUD

Conclusions

- Peru national preparedness and response plan to confront influenza pandemic developed (WHO recommendations).
- Living plan under permanent reviews and updates
- National commitment for the efficient use of resources and implementation of effective interventions, strengthening solidarity among Peruvians and the rest of the world.
- Need to strength the Andean Region efforts and organization to prepare against the vast range of emergent infectious diseases.
- Development of multi-sector strategies to address preparedness within the social and economic systems.
