Opportunities for Research and Education
Friday Harbor Laboratories
University of Washington, College of the Environment
Opportunities for Research and Education
Courses and Research Apprenticeships

FHL offers educational opportunities for students in spring, summer and autumn. Students earn credits through the University of Washington but do not need to be currently enrolled at UW to attend. Courses and apprenticeships are taught by UW faculty as well as faculty from other universities and research institutions.

The instructional program in summer is intended for graduate students and advanced undergraduates. Well-qualified undergraduates may be admitted to graduate-level courses with the consent of the director and the faculty of the courses. Summer courses (5 weeks) may be taken sequentially but not concurrently.

Courses in spring and autumn quarters (10 weeks) are targeted to undergraduate and post-baccalaureates. Research Apprenticeships are intense, full-time research training experiences offered to qualified undergraduates and post-baccalaureates in spring and autumn. Small groups work on focused research guided by faculty and graduate student mentors.

Student applications online at: http://depts.washington.edu/fhl

Scientific Facilities

Laboratories and Equipment: The teaching and research laboratories consist of thirteen buildings with running sea water. Walk-in cold rooms, a microtechnique room, a large flume and a workshop are available. Analytical equipment for general use includes centrifuges, computers, scintillation counter, HPLC, LC-Mass spectrometer, GEMS, PCR thermocyclers and other equipment for molecular biology, spectrophotometers, culture chambers, fluorescence microscope, video equipment, scanning laser confocal microscopes and electrophysiological equipment. A scanning electron microscope and transmission electron microscope may be used by investigators with appropriate training. An Ocean Acidification research laboratory, analytical chemistry laboratory and in-water mesocosms are also available.

Stockroom: The FHL stockroom loans small research equipment, labware and photographic equipment to students and investigators and provides consumable lab provisions and reagents at cost. Persons needing unusual materials, large quantities, radioisotopes or special equipment should make arrangements in advance.

Facilities for Scuba Diving & Boating: Scientific divers certified by the UW or another AAUS institution may use FHL’s five boats and a limited number of tanks and weights for specific projects approved by the Diving Officer. Study site information as well as check-out dives are provided by the Diving Officer.

Library: The FHL Library provides a core collection of books, journals and electronic resources with a focus on the marine sciences. Areas of emphasis include developmental biology, cellular biology, oceanography, fish biology, marine botany and marine ecology. Access to the UW Libraries catalog, article indexes and electronic journals is available through the library web page.

Marine Equipment: A 58-foot steel research vessel, the R/V Centennial, equipped for dredging, trawling, net hauling and water sampling is available for classwork and research. The services of an ROV submersible, capable of working to 1000-foot depths. Rowboats and outboard powered boats are also available.

Synoptic Collection: A collection of preserved marine animals and plants is available as an aid to identification and location. In addition, films of collecting and study-site surveys and color transparencies of local marine life and habitats are maintained for reference.

Importation of Species: Most imports of marine species into Washington State for research are illegal without a permit from the Washington State Department of Fish and Wildlife. Permits, when granted, will require strict quarantine of non-native organisms with no contact with the FHL seawater system.

Vertebrate Research: Persons intending to work with fish at FHL must do so under a protocol approved in advance by the University of Washington Animal Welfare Office.
The Whiteley Center

The Helen Riaboff Whiteley Center provides a retreat for established scholars and artists to study, write, create and interact with collaborators in a peaceful and stimulating environment. Scholars of any discipline may work at the Center for stays of several days to three months, undisturbed by the conflicting demands of their academic and artistic careers.

Whiteley Study Center (A. Whiteley)

The Center building provides four study rooms, a meeting room and access to the internet. Seven cottages located adjacent to the Study Center provide housing for scholars. Arthur and Helen Whiteley established this Center as a place of collegial interaction, a tribute to the faculty of the UW, and a gift to scholars of all nations. For additional information visit http://depts.washington.edu/fhl/Whiteley.

Whiteley Study Center (K. Ballard)

Scholarships & Fellowships

Scholarship and fellowship support is available to qualified students in need. This funding derives from generous donations from FHL alumni and friends of the Laboratories. Financial aid is awarded on the basis of need and merit; admission decisions are not influenced by financial aid needs. Support is available to both undergraduate and graduate students.

For additional information regarding scholarships and fellowships please visit http://depts.washington.edu/fhl/studentFellowships.html.

Ocean Acidification Environmental Laboratory

FHL’s new Ocean Acidification Environmental Laboratory is operational and gathering data. It consists of three major components, the in-water mesocosms installed off the FHL dock, indoor mesocosms with temperature and pH control and an analytical chemistry laboratory. The lab is capable of hosting a wide range of projects and, in addition to serving the needs of FHL scientists, the lab will host a summer course and an undergraduate research apprenticeship in 2013. For additional information visit http://depts.washington.edu/fhl/oael.html.

Mellon Faculty Support

Mellon Foundation support is available for qualified visiting faculty and researchers who bring cultural or ethnic diversity to FHL. It is intended for independent researchers and faculty who serve as research mentors at any time of the year. Interested persons should contact the FHL Director at sebens@uw.edu.

Blinks/NSF REU/Beacon Internship Program

The Blinks/NSF REU/Beacon Summer Internship program offers hands-on, full-immersion summer research internships to 10-12 motivated undergrads and post-baccalaureates. By linking students with marine scientists, students learn both the process and the substance of scientific research. Participants in this NSF Research Experiences for Undergraduates program will work 1:1 with a scientist on a full-time basis for eight weeks. The program is funded by the National Science Foundation and the Blinks Endowment, supplemented with generous support from the Andrew W. Mellon foundation, ASCB and FASEB. The 2012 research projects can be found at http://depts.washington.edu/fhl/REU.html.

Post-Doctoral Fellowships

FHL supports a post-doctoral scientist for a two-year appointment to establish an active research program and assist the Director and Resident Associate Director in facilitating the efforts of visiting scientists and students. Applications are welcome from scientists with qualifications in any area of marine research readily supportable by FHL. For additional information regarding post-doctoral fellowships, please visit http://depts.washington.edu/fhl/resPdocFellowInfo.html.

Dr. Kenneth P. Sebens, Director

“At the UW Friday Harbor Labs, we are dedicated to providing excellent facilities for research and education in a region with high biodiversity and unique habitats. We serve a broad user group, including researchers and students from many institutions and from many countries. I hope you can join us at FHL this year.”

Personnel

Administration & Support Staff

Director: Dr. Kenneth P. Sebens
Administrator: Scott Schwinge
Advancement: Rachel Anderson
Fiscal Specialist: Aimee Urata
Student Coordinator: Stacy Markman
Facilities Coordinator: Vikky Daucunias
Whiteley Coordinator: Kathy Cowell
Marine Supervisor: Dr. David Duggins
Diving Safety Officer: Pema Kitaeff
Boating Safety Officer: Kristy Null
Sr. Computer Specialist & R/V Skipper: Dr. Craig Staude
Computer Specialist: Alan Cairns
Maintenance Supervisor: Fred Ellis
K-12 Education: Jenny Roberts
Stockroom: Jeannie Meredith
Dining Hall: Laurie Spaulding

The University of Washington reaffirms its policy of equal opportunity regardless of race, color, creed, religion, national origin, sex, sexual orientation, age, marital status, disability, or status as a disabled veteran or Vietnam era veteran in accordance with University policy and applicable federal and state statutes and regulations. The University of Washington is committed to providing access, equal opportunity and reasonable accommodation in its services, programs, activities, education and employment for individuals with disabilities. To request disability accommodation in the application process, contact Friday Harbor Laboratories at fhlfac@uw.edu.
