

How to access flow data on the server using a PC

- 1.) Right Click on "Computer"
- 2.) Scroll down to "Map network drive..."
- 3.) Type the network path:
\\immun-black.medicine.washington.edu\users
- 4.) If you log into your computer with an **Outpost account** or **medicine.washington.edu** account, check the "connect using different credentials"
- 5.) Click "Finish"
- 6.) Enter "netid\username" and your password (where the username is your UWNNetID and the corresponding password) click "OK"
- 7.) a network share will now be visible in your file window. Your data is in the folder with your netid. If you cannot see this folder, please contact the facility to correct your permissions.
