

GENETIC SERVICES POLICY PROJECT
Advisory Committee Meeting
April 8, 2005

QUESTIONS TO CONSIDER

1. What genetic issues (broadly defined) are on the radar screen of your organization?
2. How long have these issues been on your radar screen?
3. What pressures put them there?
4. Is there a “genetics champion” in your organization? If so, who (what job title)?
5. Do you discuss genetics/genetic services issues with:
 - a. Your board?
 - b. Your membership?
 - c. Your medical staff?
 - d. Your clients/consumers?
6. Has your organization undertaken any studies related to genetics/genetic services?
 - a. If so, what kinds of studies?
 - b. For what purpose were the studies conducted?
 - c. How were the studies used?
 - d. To whom were the results of the studies disseminated?
 - e. What was the result?
 - f. May we have a copy?
7. Is your organization planning to do any studies related to genetics/genetic services in the next year? How are you planning to use the information from these studies?
8. What is your organization’s current level of knowledge/understanding about genetics and genetic services?
9. Where does your organization get information about genetics and genetic services?
10. What information would your organization like to have that it does not have?
11. How would your organization use that information? When?
