An unexpected path from the laboratory to the clinic: a dog's story

Casey Childers, DO, PhD
Professor of Rehabilitation Medicine
University of Washington

Friday, February 9, 2018
12:00 - 1:00pm
Orin Smith Auditorium
UW SLU Campus, 850 Republican Street

Refreshments will be provided.

Gene therapy for myotubular myopathy, a congenital muscle disease that causes severe and fatal weakness of the breathing muscles, is a focus of the Childers lab. Their international research group worked to develop this new gene therapy technology to translate findings from animals to treat human patients.

Dr. Martin K. (Casey) Childers also practices medicine through the Rehabilitation Medicine Clinic at UWMC, working with patients with devastating muscle diseases.

To get on the ISCRM announcement email list, contact Leena Pranikay at pranikay@uw.edu.

To request disability accommodation, contact the Disability Services Office at least ten days in advance at: 206.543.6450 (V), 206.543.6452 (TTY), 206.543.7264 (FAX) or dso@uw.edu.
