PARIS, Feb. 4.—The following report was issued today on the territorial division of the Czecho-Slovakia and Poles:

ON THURSDAY AT 10 A.M.

There will be much cheering, and there will be some who fear. Both these emotions are useful, but not too much of either. We are undertaking the most tremendous move ever made by LABOR in this country, a move which will lead to no one need hysteria. We need the iron march of labor.

A few hot-headed enthusiasts have complained that strikers only should be fed, and the general public left to endure severe discomfort. Aside from the inhumanitarian character of such suggestions, let them get this straight—

NOT THE WITHDRAWAL OF LABOR POWER, BUT THE POWER OF THE WORKERS TO MANAGE WILL WIN THIS STRIKE

What does Mr. Piez of the Shipping Board care about the closing down of Seattle's shipyards, or even of all the industries of the northwest. Will it not merely strengthen the yards at Hog Island, in which he is more interested?

The present strikes are the first step toward socialization of British industries and their control by the workers. We are revolutionary in our philosophy and hope to enter the revolutionary congress to be called by Premier Lenin.

We are already represented 50 per cent of the English laborers. We are direct actionists, as opposed to the regular unionists, who will submit to the new regime, but if they are obstinate we intend to be firm. Personally, I would not be surprised to see a copy of the San Francisco Daily News tucked in the door, floating one finger on a picture of Lenin, as with the communists.
