Healthy volunteers needed for a neuroimaging research study

Experiments to investigate brain areas involved in attending to sound sources.

We are looking for **healthy volunteers** to participate in a brain imaging study. You should be **above 18 years of age** and have normal/corrected vision. You should be willing to loosen your hair for M/EEG (magneto-/electro-encephalography) if you have braided or tightly pulled back hair. You should not have metallic parts in your body, or any other factor to exclude you from **M/EEG** or **MRI experiments**.

Depending on the experiment, you may participate in M/EEG and/or structural/functional MRI sessions. You will be asked to perform auditory and/or visual task during the M/EEG and/or functional MRI scan on separate days. Sessions last less than 3 hrs/day (number of sessions varies).

Payment: \$20/hr for Imaging experiments; \$15/hr for Behavioral experiments

Location: Portage Bay Building (opposite UW Medical Center)

Email: LABSN.subjects@gmail.com

(Please note that we cannot guarantee the confidentiality of email communications.)

Principal Investigator: Adrian KC Lee, ScD
