

## Biography, Prof. Lee Park

---

BA, Wellesley College (1986)

PhD, MIT (1992)

Postdoc, IBM TJ Watson Research Center

At Williams College since 1993

Visiting Scientist at University of Michigan, Ann Arbor (spring, 1997)

Visiting Scientist at MIT (1997-2002)

Visiting Scholar at University of Washington, Seattle (2007-08)

Prof. Park has served as department chair (2002-2006), as well as on a variety of campus committees at Williams. She is also serving currently on the Committee for Professional Training of the American Chemical Society.

Prof. Park was trained as a synthetic organometallic chemist, but over the years has moved more towards materials chemistry, broadly speaking. Her interests are in self-assembled systems, and she has been working primarily in the synthesis and characterization of liquid crystalline materials, including metal-containing liquid crystalline materials. More information regarding Prof. Park's research may be found on her website: <http://www.williams.edu/Chemistry/lpark/index.www.html>.
