The Department of Pathology invites applicants with an M.D. or Ph.D. degree to apply for a faculty position in Pathology Informatics. The individual will serve as a liaison between the Department of Pathology and the information technology areas for both the University of Maryland School of Medicine and the University of Maryland Medical Center. As appropriate, the individual will be involved in systems and informatics issues beyond the laboratory, such as, online clinical knowledge creation and management. The applicant should have experience in medical informatics as it specifically relates to the pathology laboratory in a large academic medical center. The individual should also have an academic orientation, as they will be required to be active in relevant teaching and research programs and develop independent funding. Appropriate training, experience and evidence of scholarly achievement are required. Academic appointment and salary will be commensurate with experience.

The University of Maryland School of Medicine is the first public and fifth oldest medical school in the United States. The School of Medicine was the founding school of the University of Maryland and today it is an integral part of the 11-campus University of Maryland System. On the University of Maryland at Baltimore campus, the School of Medicine serves as the foundation for a large academic health center that combines medical education, biomedical research, patient care and community service. The School of Medicine ranks in the top tier of medical schools and is ranked 8th in research funding at public medical schools. In 2004, external research funding exceeded $280 million.

Please forward curriculum vitae, a brief statement of recent interests, and the names of three references to:
