

You receive a CPOE order for a COMP, MG, and PPP with one PS and one BL tube. The COMP is on accession number M12345, and the MG and PPP are on M23456. There are two ways to combine the accession numbers:

Example 1 - cancel the COMP

M12345	M23456
COMP	MG, PPP

Since nothing will be run on M12345, route it as "NT"

Example 2 - Cancel the MG

M12345	M23456
COMP	MG, PPP

Since a PPP will still be run on M23456, remove the PS and route as BL only
