

THE FOURTH ANNUAL  
UNIVERSITY OF WASHINGTON  
SCHOOL OF MEDICINE

ALL-SCHOOL  
CELEBRATION

SATURDAY, JUNE 5, 2004  
DON JAMES CENTER  
UNIVERSITY OF WASHINGTON

UW Medicine  
SCHOOL OF MEDICINE

The Fourth Annual  
University of Washington  
School of Medicine  
All-School Celebration Banquet

Welcome

**John H. Vassall, M.D. '78**

*UW Medicine Alumni President*

Comments

**Paul G. Ramsey, M.D.**

*Vice President for Medical Affairs and Dean of the School of Medicine*

Introductions and Inauguration of the Class of 1954 into the 50-Year Association

**Werner Sampson, M.D. '53, Class Representative**

Presentation of the 2004 Medical Alumni Awards

**Neil Hampson, M.D. '81**

*Chair, Medical Alumni Awards Committee*

Distinguished Alumni Award

**Jerry Trier, M.D. '57, Res. '62**

Introduced by Richard Tremblay, M.D. '57

Humanitarian Alumni Award

**Walt Hollow, M.D. '75, Res. '78**

Introduced by Richard Layton, M.D. '54

Acknowledgment of Service – John H. Vassall, M.D.

**Dean Paul G. Ramsey**

Closing Comments

**John H. Vassall, M.D.**

*Music: Carl Staaf Trio, UW School of Music*

the National Heart Institute, then became a UW faculty member in the Department of Surgery as well as a clinical investigator with the Veterans Administration Hospital in Seattle.

Eugene's research interests were focused on vascular surgery. He was the head of the Division of Vascular Surgery at the UW until 1995, was widely known and published in the field of vascular disorders, and served on the editorial board of six major journals.

Eugene practiced medicine until he passed away in January 2002. His wife, Edith, lives in Bellevue, Wash. They have four children.

**James Vandenberg, M.D.**

James was born in Seattle in 1928. He retired from practice in 1998, and lives in Normandy Park, Wash. with his wife, Dorothy. They have seven children.

---

**Joseph Voegtlin, M.D.**

Joseph was born in Seattle in 1926. He retired from practice in 1992, and lives in Mount Vernon, Wash. with his wife, Gerine. They have three children.

---

**Arthur Wilson, M.D.**

Art was born in rural North Dakota in 1918. Having lost their farm to the combined forces of drought and the Great Depression, his family moved to Washington. He finished high school in Auburn, Wash., then worked as an apprentice carpenter in Seattle and Dutch Harbor, Alaska. When he returned to Seattle, he joined the U.S. Merchant Marines and sailed as pharmacist-mate and purser in the Pacific Theater during WWII.

Art returned to Seattle after his military service and entered the University of Washington, where he completed his pre-med studies and received his M.D. When he graduated, he completed an internship at Harborview Medical Center in Seattle. He met his wife, Frances, while training at Seattle's Veterans Administration Hospital. They married in 1955, then moved to Milwaukee, Wisc. for Art's ophthalmology residency.

The couple returned to Seattle in 1958 and made a home on the outskirts of Burien, Wash. In 1963, Art and another physician started the Burien Eye Clinic, which still exists today. He also served as the attending ophthalmologist at the Rainier School in Buckley, Wash. before retiring in 1998.

Art and Frances have enjoyed traveling together to Europe, Australia, Alaska,

### **Thomas Shull, M.D.**

Thomas Shull was born in Moscow, Idaho in 1929. He wrote that he was “blessed to have been a Robert H. Williams resident (1959-60) and enjoyed the benefits of the superior training received: 45 years of careful patient care.” He is currently living in Georgia with his wife, Susan.

---

### **Thomas Skalley, M.D.**

Thomas was born in Everett, Wash. in 1926. He retired from practice in 1997 and lives in Everett with his wife, Marianna. They have two children.

---

### **Wayne Smith, M.D.**

Wayne was born in Poplar, Mont. in 1922. He served in the U.S. Navy during WWII and earned a bachelor’s degree and a master’s in microbiology at the UW before enrolling in the School of Medicine. Wayne is still grateful to Dr. Charles Evans, who was then the chair of the Department of Microbiology, referring to Evans as “a superb human being.” Evans helped Wayne with the grants and fellowships that kept Wayne, his wife, and their three children afloat throughout medical school.

During Wayne’s internship at Harborview Medical Center in Seattle, he received an exceptional amount of surgery training when the chair discovered they were both from Montana. After his internship, he entered private practice in Chehalis, Wash. Wayne retired in 1993, and notes that he had “40 years of exciting and gratifying practice in medicine, surgery, and obstetrics.”

Wayne also attributes much of his interest in hiking and outdoor recreation to his original mentor, Dr. Evans. He spent part of 28 summers in Alaska with the Foundation for Glacial Research. He also guided 20 trips in the Himalayas, providing medical care for sherpas and studying high-altitude pulmonary and cerebral edema.

Wayne’s first wife, Marjory, is now deceased. He lives in Chehalis with his wife, Karen.

### **Donald Eugene Strandness, Jr., M.D. 1928-2002**

Eugene was born in 1928 in Bowman, N. Dak. He earned a bachelor’s degree at Pacific Lutheran University in Tacoma, Wash. before enrolling at the UW School of Medicine. He completed a rotating internship at Philadelphia General Hospital, returned to the UW for a surgery residency, and then entered the U.S. Air Force for two years. After military service, he did a fellowship with

long-standing interest in endocrinology, but was denied. The program's director felt she should not serve as a resident because she had a child and a husband to care for, and would not consider her application. Having done exceptionally well in psychiatry, Maryonda decided to apply for a psychiatry residency, instead, and received a much more supportive response. She completed her residency at the Veterans Administration Hospital in Seattle in 1959.

Maryonda has been a member of the faculty in the UW Department of Psychiatry since completing her residency. She worked as a staff psychiatrist at the VA until 1980, and was an active medical staff member at Harborview Medical Center in Seattle until she retired from practice in 2003. She feels fortunate to have had a career in psychiatry, and commented that her patients were always fascinating and her colleagues supportive. Maryonda and her husband, Allen, live in Mercer Island, Wash. They have two children and three grandchildren.

---

### **J. Paul Shields, Jr., M.D.**

Paul was born in Mystic Lake, Mont. in 1929 and still lived in Montana when he sent a request for an application to the UW School of Medicine. When the school responded that they were not accepting students who weren't Northwesterners, Paul wrote back, saying that Montana students were in a "no-man's land." He promptly received an application.

Paul's first year started eventfully; he was in a car accident on his way to Seattle, had his suitcase full of clothes stolen from the accident scene, and then received a military draft notice after only a month of medical school. Dean Edward Turner advised Paul to take the physical, and told him that he would straighten everything out. While Paul received two more notices for the physical, he never received a third, and did not hear from the draft board again.

For their internships, Paul and three classmates traveled to Marion County General Hospital in Indianapolis, Ind. The four were considered outstanding interns, and Paul realized that their education at the UW School of Medicine had been exceptional. He followed the internship with a year's residency in internal medicine. Paul particularly enjoyed cardiology, and accepted Krannert Heart Institute's offer of a cardiology fellowship in Indianapolis.

After his fellowship, Paul spent two-and-a-half years in Athens, Greece as a doctor for the U.S. Air Force. Then he returned to the Northwest to practice cardiology. Deaconess Hospital in Spokane, Wash. was eager to have him join their staff, and two years later he was appointed their director of cardiovascular services. In 1970, he formed a private cardiology practice with three other doctors. He also served on staff at several other medical centers over the course of his career. In 1981, Paul completed a course in nuclear cardiology and later worked in electron-beam scanning in Hawaii for 10 months. Afterward, he returned to Spokane and retired in 2001. Paul and his wife, Sharma, live in Spokane and have five children.

---

### **Fred Reeb, M.D.**

Fred was born in Edison, Wash. in 1926. As a child, he lived in an Eskimo village on the bank of the Yukon River near the Bering Sea. He was raised in Alaska, living in Juneau, Kodiak, Seward, and Anchorage before leaving at age 18 to serve as an electronics technician in the U.S. Navy. After his Navy service, he enrolled at the UW, but he returned to Alaska during summer breaks to work in construction.

After training at Los Angeles County Hospital, Fred went into general practice in Renton, Wash., where he stayed for 39 years until his retirement in 1995. While there, he established a family practice clinic and served as an assistant clinical professor in the Family Practice Department at the UW. He also served as the president of the King County Academy of Family Physicians.

Fred is proud to have been involved in the promotion of medical services for Kent and Renton, Wash., efforts that culminated in the creation of an institution now called Valley Medical Center. He served as chief of staff at Valley and helped found its family practice residency program in association with the University of Washington.

Fred has been a lifelong athlete, and has enjoyed skiing, fishing, running, and mountain climbing over the years. But cycling has been his sport of choice since he took it up at age 58. Combining a love of cycling with a love for travel, Fred has taken bike trips through many countries. It was on one such trip to Australia that Fred lost his wife, Lois, after 47 years of marriage. She was in an accident with a passing motorist in 1999.

Fred lives in Bellevue, Wash. and continues to enjoy cycling with a regular group of friends. He also continues to enjoy skiing, hiking, gardening, and reading. Fred likes to spend time with his family — including five children and four grandchildren, all of whom live in Washington. “Medical school was a wonderful experience, defining the rest of my life,” he says. “Without hesitation, I would do it again. Life and my career have been good to me — even with my recent loss.”

---

### **Maryonda Scher, M.D.**

Maryonda was born in Oakland, Calif. in 1931. She earned a bachelor’s degree in chemistry from the UW before enrolling in the School of Medicine. She remembers feeling like part of an elite fraternity during her first week of medical school, when Dean Edward Turner told the incoming class, “I want you to consider yourselves my — and the rest of the faculty’s — junior colleagues.”

Maryonda married her husband, Allen, the summer after her second year of medical school. She was happy to be doing clinical work. After graduation, she was only a few months into her internship at Seattle’s Virginia Mason Hospital when she became pregnant. She attempted to apply for an internal medicine residency to pursue her

Donald and his wife, Naomi, have been married since 1953 and have lived on Mercer Island since 1957. They have two sons. In retirement, they have traveled in Europe, and have sailed their boat around the San Juan Islands and in Canadian waters.

**Lloyd Olson, M.D.**

Lloyd was born in Langford, S. Dak. in 1925. He retired from practice in 1991. He and his wife, Barbara, live in St. Croix Falls, Wisc., and have seven daughters.

**Richard Paton, M.D.**

Richard was born in Wenatchee, Wash. in 1928. He received a bachelor's degree in physics from the UW before entering the School of Medicine. Richard remembers his class being impressed by the brand new medical school complex and by the School of Medicine's new and enthusiastic faculty. One Sunday morning, he and classmate Tom Shull were startled to see Dr. Clem Finch scaling the outside of a school building and entering by way of a third-story window — Finch had left his lab keys at home. Richard also remembers that although medical school was intense, he and his classmates knew when to take a break, sit back, have a beer, and enjoy each other's company.

Richard completed his medical internship at Massachusetts Memorial Hospitals in Boston, where his training with UW's Belding Scribner made him a hot commodity. During his infectious disease rotation, when it became known that he could "do electrolytes with the magical gray box of Dr. Scribner" — a bedside kit the UW professor had developed — he was frequently called upon for help. The hospital's chief of medicine was an advisor to the Surgeon General and urged Richard to apply for residency with the National Institutes of Health. Richard did. As a result, he was assigned to the National Cancer Institute in Bethesda, Md. He returned to the UW the next year and became one of two chief residents.

In 1960, Richard joined the Mason Clinic in Seattle, where he spent the next 33 years in practice. His primary interests included renal disease and hypertension and, during his last 15 years of practice, the study of anti-hypertensive drugs.

Richard and his wife, Patricia, who was in nursing management at Virginia Mason Medical Center, both retired in 1993. Since then, they have enjoyed busy and challenging lives filled with numerous interests, including enjoying their grandchildren, making a home on Lopez Island, Wash., investing and on-line trading, flying a Cessna, playing bridge, and making bird-hunting and fishing trips to British Columbia.

residency. Eugene then moved to Oakland, Calif. for a final residency in clinical pathology. After completing his residency training, he worked in hospital pathology in the San Francisco area until his retirement in 1996.

Eugene is grateful for his education at the UW School of Medicine and for the contributions of its faculty to the field of medicine. He writes, "In my years of hospital pathology practice, I always felt a quiet pride when I heard clinicians speak of a Bruce protocol or Scribner shunt, or when the bacteriology technologists referred to their Kirby-Bauer plates." He feels that in his brief career as a general practitioner, he and his patients benefited most from principles he learned from his teachers at the UW.

Retirement is providing Eugene the time to read, attend lectures, and otherwise pursue his interest in the frontiers of science. He and his wife, Catherine, live in California and have been enjoying traveling and spending time with their four children.

### **Donald Nothstein, M.D.**

Donald was born in Corvallis, Ore. in 1925 and raised in Tacoma, Wash. He enlisted in the U.S. Army Air Force in 1943 and had three years' active duty, including 16 months as a navigator in the Pacific Theater of WWII. He obtained a bachelor's degree from Pacific Lutheran University (PLU) in 1950 before beginning medical school at the University of Washington. He completed an internship at U.S. Public Health Hospital in Baltimore, Md., then served a year with Public Health Service at Crow Agency Indian Reservation. He returned to Tacoma and was the campus physician and biology teacher at PLU for a year before completing a pathology residency at the UW.

Donald stayed in Western Washington after completing his training and worked in pathology at Overlake Hospital in Bellevue and Renton Hospital. He and a partner also started a small outpatient clinical laboratory called Eastside Medical Laboratory. Over the next 30 years, their two-man partnership grew to include 12 pathologists and 250 other employees. Developing the laboratory consumed much of Donald's time, and he became more involved in the business side of the enterprise. While he retired from full-time practice in 1985, he was involved with the laboratory until it was sold in 1994.

Donald considers himself very fortunate to have attended the UW School of Medicine from 1950 to 1954. He says, "We had the benefit of extremely intelligent professors, some with personalities unlike anyone I had run into before — such as R. J. Johnson, H. Stanley Bennett, and later, Henry Harkins, Robert Williams, and Russell de Alvarez. I will never forget my teachers and classmates, the classes, clinics, the frightening exams, and the great parties and celebrations when they were over. In fact, I wouldn't mind doing it all over again!"

to the military as a physician. The military's response came only a few days later, in a letter that cancelled his orders for active duty.

After graduating, Alexander did an internship at Doctor's Hospital in Seattle, followed by a residency at the Mason Clinic. He spent his entire career at Group Health Cooperative in Seattle, where he served as chief of radiology for 25 years. Alexander retired from practice in 1994 and lives in Seattle with his wife, Valentina; they have two daughters.

---

**Andrew Martinis, M.D.**

Andrew was born in 1925 in Everett, Wash. Before entering medical school, he served in the Pacific Theater on a Navy destroyer during WWII. He completed a surgery residency at the University of Washington and was on staff at several hospitals in the Seattle area — primarily Swedish Hospital — until retiring in 1995. Andrew is particularly proud of his contributions to the development of cardiac pacemakers. He and his wife, Magna, live in Edmonds, Wash. and have a son and a daughter.

---

**Clinton Merrill, M.D. 1928 - 1986**

Clinton was born in Duluth, Minn. and raised in Harrah, Wash. He did his internship and residency at Virginia Mason Medical Center in Seattle. Clinton later worked in Cheyenne, Wyo., Yakima, Wash., and Bellevue, Wash. before moving to Casa Grande, Ariz. in 1983, where he and his son began a joint medical practice. Clinton and his wife, Virginia, have four children.

---

**Hugh Minor, M.D.**

Hugh was born in Everett, Wash. in 1925. He retired from practice in 1992 and now lives in Marysville, Wash. with his wife, Jackie. They have three children.

---

**Eugene Moloney, M.D.**

Eugene was born in Bucoda, Wash. in 1927. After graduating from medical school, he did a one-year rotating internship and a one-year general practice residency at Providence Hospital in Seattle, followed by two years of general practice in the Snoqualmie Valley area. He returned to Providence in 1958 and spent two years in an anatomic pathology

---

### **Richard Layton, M.D.**

Dick was born in Fond du Lac, Wisc. in 1927. During medical school, he worked at Group Health Hospital and became good friends with the chief of staff, Dr. Gus Bansmer. Dick completed an internship at Receiving Hospital in Detroit, Mich. When Dr. Bansmer contacted him to ask if he wanted to practice with him in Grandview, Wash., Dick accepted, even though he had not heard of this small town in Eastern Washington. He spent 19 years in practice there with Dr. Bansmer. Together, they developed a four-doctor clinic and, eventually, two branch clinics. They enjoyed serving rural patients, which included a large population of Latinos. And they were able to benefit the School of Medicine, too, by hiring two graduates from UW's MEDEX Northwest Physician Assistant Program, and serving as one of UW Medicine's first WWAMI sites. Dick and Dr. Bansmer also started a school for L.P.N.s.

Next, Dick began a family practice residency, part of the UW's Family Practice Residency Network. His efforts resulted in the creation of the Family Practice Residency Directors' Association, and he was elected its first president. For 20 years, Dick also trained residents to care for inner-city, low-income patients at Providence Medical Center in Seattle. The Sisters of Providence and the Franciscan Healthcare Sisters later sponsored a company, the Medalia Corp., and made Dick its medical director. He was charged with developing a series of regional clinics in a three-county area in the Puget Sound region. Over a five-year period, Dick's efforts produced 50 clinics staffed by nearly 400 physicians.

Dick lives in Seattle with his wife, Marilyn. When they married in 1975, he had three grown children, and she had two younger children; they now have nine grandchildren with whom they love to spend time. They enjoy traveling and stay as frequently as possible in Depoe Bay on the Oregon Coast. Dick is once again pursuing education by taking classes at North Seattle Community College, where Marilyn has taught for more than 30 years.

---

### **Alexander Mansy, M.D.**

Alexander was born in Seattle in 1925. He completed four quarters of undergraduate studies at the UW before being drafted into the military in 1944. He served in Europe as a radio operator, was honorably discharged in 1946, and returned to the UW for pre-medical studies. In 1950, before beginning medical school, Alexander was married. When the couple returned from their honeymoon, they found a letter calling him back to duty in Europe. Alexander appealed to Dean Edward Turner, who immediately wrote to the military on his behalf, explaining that Alexander would be far more useful

---

## Henry Kuharic, M.D.

Henry was born in Renton, Wash. in 1928, the first generation of his family to be born on American soil. His father had made a lone trek from Croatia as a teenager in 1905, while his mother emigrated from Slovenia with her parents when she was 12.

Henry was raised on a farm outside of Issaquah, Wash. He rode the bus 24 miles to a one-room school in Newcastle, then attended middle and high school in Issaquah. He was a finalist in the national Westinghouse Science Talent Search and accepted a full scholarship to Harvard. Henry returned to Seattle to enroll in the School of Medicine at the University of Washington, excited about being a part of a brand new school, and ready to learn from its innovative faculty.

Henry went back East to Philadelphia General Hospital for a rotating internship and then to the University of Cincinnati for a year of internal medicine residency. He was drafted into the U.S. Army for two years and served as chief of medical and laboratory services at a station hospital.

After Henry completed his military service in 1958, he finished his internal medicine residency at the University of Colorado. He continued with a teaching and research fellowship and ultimately became interested in pulmonary medicine. Henry became a staff physician at the Firland Sanatorium, a tuberculosis hospital in Seattle, where he taught chest disease diagnosis and treatment. Later, he was a tuberculosis consultant to the Olympic Health District.

Henry became very involved in health care both locally and internationally, and believes strongly in the impact of good patient-doctor relationships. He trained Peace Corps volunteers in tuberculosis eradication and made two trips on the *Project Hope* hospital ship — one to Indonesia and one to Colombia. Henry also played a major role in health-care planning for King County. In addition to many community and volunteer affiliations, Henry maintained a private practice in the Seattle's First Hill neighborhood for 30 years. He was known as the "country doctor in the city" because of his willingness to keep late hours and make house calls.

Henry officially retired from practice in 1990 when he was diagnosed with metastatic cancer, but has since been intensively involved with international volunteer work. He also makes frequent local visits to former patients and their families. Henry says, "One of the great benefits of living and practicing in Seattle has been the continuing friendship, cooperation, and consultations with the faculty of the School of Medicine. I am sure this is due largely to the fact that we pioneered this great school together."

After graduation, he completed a rotating internship at Methodist Hospital in Brooklyn, then returned to Kodiak, Alaska with his wife, Marian, and their toddler son. Bob became very active in the Kodiak community and, while maintaining his family practice, entered into other activities: beginning a production company for historical drama, for instance, and serving as editor of three local publications. Bob took a special interest in chemical dependency treatment and founded the Kodiak Council on Alcoholism; he later served as the director of the non-medical detoxification unit. He also worked with Kodiak Island Hospital and started the Kodiak Mental Health Center.

Bob and Marian live in Kodiak, where they raised four sons. Bob is part of an *a capella* singing group and a jazz ensemble, and continues his work with the Alaska Pioneers of Kodiak. He retired from practice in 1994.

**Gordon Katznelson, M.D.**

Gordon was born in Vancouver, B.C. in 1929. He is still practicing and lives in San Francisco, Calif. with his wife, Doris. They have three sons.

**Robert Kraft, M.D.**

Robert is a WWII veteran and flew 30 Air Force missions over Germany as a lead navigator before starting medical school. He did his pre-med studies as a graduate student, having completed three years of electrical engineering and a year in seminary before deciding to try medicine.

After medical school, Robert interned in New York and practiced family medicine in Puyallup, Wash. for three years. He then trained in pathology at Tacoma General Hospital and the University of California, San Francisco. Robert intended to return to the Northwest, but found there were more pathology job opportunities in Northern California. He worked at Peninsula Hospital in Burlingame, Calif., where his background and interest in electrical engineering led him to an exciting new field: nuclear medicine. Robert became state president of the Society of Nuclear Medicine and the American College of Nuclear Physicians, and served for six years on the American Board of Nuclear Medicine. He spent 30 years in a pathology and nuclear medicine practice at Peninsula Hospital and Mills Hospital in San Mateo, Calif.

Robert's wife, Angela, passed away in 2002. They were married for 53 years and had three children. Robert will be attending the "D-Day Plus 60" ceremony in Normandy, France in June 2004, and regrets having to miss his class reunion.

the end of his career, he was happy to witness a significant decrease in the mortality rate of patients suffering from the disease.

Charles ended his private practice in 1991, then worked at a veterans hospital for a few years before retiring. He and his wife, Betty, were married in 1957 and have one daughter. Charles passed away in July 2002.

---

### **Galen Hoover, M.D.**

Galen was born in Sunnyside, Wash. in 1923 and earned a bachelor's degree at the College of Puget Sound in Tacoma. He and his first wife, Patricia, had three children when he entered the School of Medicine.

He did an internship at Tacoma General Hospital, then worked in general practice in Tacoma for 10 years with classmate Bob Johnson. Galen had a great interest in surgery, and, at the age of 42, he began an orthopaedic surgery residency at Henry Ford Hospital in Detroit, Mich. He remembers that the other students in his residency looked up to him because he was older, and because they observed his easy communication — developed from years in general practice — with patients. Galen completed a six-month hand fellowship at the University of Iowa, then returned to Tacoma to open a general orthopaedic office with a specialization in hand surgery. At that time, he was the only trained hand surgeon in Tacoma, and his office grew to include seven orthopaedic doctors.

Galen made several week-long trips to Mazatlan, Mexico to perform free orthopaedic surgeries for those who could not afford them. In 1988, he contributed a month's worth of medical service in India. He says, "One gets far, far more out of life by giving of yourself than trying to collect and accumulate everything for yourself — you can't take it with you when you go."

Galen's first wife, Patricia, passed away in 1986. They had been married 42 years, and had five children together. He married again, to another Patricia, who had two sons from a previous marriage. After Galen retired in 1994, he and Patricia moved to Selah, Wash. where they own about 1,200 acres of land in the Wenas Valley.

---

### **Robert Holmes Johnson, M.D.**

Robert was born in St. Helens, Ore. in 1925. He attended high school in Kodiak, Alaska and graduated in 1942 as class valedictorian. He earned a bachelor's degree in marine science at the U.S. Merchant Marine Academy in Kings Point, N.Y., and later attended the University of Willamette, where he earned a bachelor's degree in biology. He then received a master's degree in zoology from the University of Michigan before starting medical school at the University of Washington.

cer of the Hawaii Permanente Medical Group, and became chief of staff at Kaiser Foundation Hospital, then regional medical director of the Kaiser Permanente Medical Care Program for the state of Hawaii. He held these positions for 21 years, until his retirement in 1992.

William and his wife, Daisy, live in Honolulu. They have four children. William says, "I know that I received an excellent medical education from the University of Washington, and feel that my career has been successful. This success has to be attributed to my education at UW."

**Richard Grant, M.D.**

Richard was born in Tacoma, Wash. in 1927. He lives in Olympia, Wash. with his wife, June. They have three daughters and a son. Richard stopped practicing in June 2003.

**George J. Hiester, M.D.**

George was born in Seattle in 1929. He did his internship with San Francisco County Hospital, then enlisted in the U.S. Air Force as a medical officer. When he completed his assignment, he returned to Seattle for an internal medicine residency with University of Washington Hospitals.

Since finishing training in 1958, George has maintained a private family practice in Santa Maria, Calif. He also has been on staff at local hospitals, including Marian Medical Center, where he has served in many capacities, including as chairman of the Department of Medicine, chairman of the Credentials Committee, and a member of the Quality Assurance Committee. George also has served three times as chief of staff at Valley Community Hospital, where he now is chairman of the Department of Medicine. In 1984, he organized the Marian Independent Physicians Association, which has grown to include 18,000 members and 55 member physicians. He has five children and lives in Arroyo Grande, Calif. with his wife, Mary Ellen.

**Charles W. Holeman, M.D. 1926 – 2002**

Charles was born in Blaine, Wash. in 1926. After earning his medical degree at the University of Washington, he completed an internship at Mary Hitchcock Memorial Hospital in Hanover, N.H., then served in the Air Force for two years as a medical officer. Charles accepted an internal medicine residency at Mt. Zion Hospital in San Francisco and went to work at Kern General Hospital in Bakersfield, Calif. His studies focused in coccidioidal meningitis and, by

James served in the U.S. Navy from 1955 to 1967 as an active-duty neurosurgeon in New York, Vietnam, and Japan. He served another 10 years in reserve duty at the U.S. Naval Hospital and neurosurgery clinic in Long Beach, Calif. before retiring as a commander in the Medical Corps of the U.S. Naval Reserve.

In 1990, James earned a J.D. from Willamette University in Salem, Ore. (with a special certificate in dispute resolution), and the distinction of being the oldest graduate (at 62) in the history of the law school. He is still practicing medicine and law, has two sons, and lives with his wife, Susan, in Turner, Ore.

### **Arne Dahl, M.D. 1924 - 1991**

Arne was born in Volda, Norway in 1924 and died in 1991. He and his wife, Margo, have four children. Margo lives in Bremerton, Wash., and spends her summers in Belfair, Wash.

### **Harold B. Dowling, M.D.**

Harold was born in Seattle in 1923 and was educated in the Seattle school system. He completed pre-med studies at the University of Washington before beginning medical school. After graduation, he left the Northwest for an internship at Indianapolis General Hospital and a general residency at Providence Hospital in Indianapolis, Ind. After his residency, he moved to Oregon, where he maintained a general practice in Sweet Home from 1956 to 1971 before moving his practice to Lebanon, Ore. In 1994, he began doing various locum tenens, and retired in 1999.

Harold and his wife, Leota, still live in Sweet Home, Ore. They have three daughters and three sons. Harold expressed gratitude to Dean Edward Turner and said, "It's been a very satisfying life!"

### **William Dung, M.D.**

William was born in Honolulu, Hawaii in 1929. After completing medical school, he did an internship at Providence Hospital in Seattle, then returned to Hawaii to do an internal medicine residency at Honolulu's St. Francis Hospital. He married in 1956 when his residency ended, and started a private practice in Kaneohe, Hawaii. In 1957, he had a momentous year; his first daughter was born, and he was drafted by the U.S. Marine Corps.

When William's military service was completed in 1959, he joined the Kaiser Medical Care Program in family practice and worked as a practicing physician until December 1970. At that point, William was elected president and chief executive offi-

---

### **G. Malcolm Cottingham, M.D.**

Malcolm was born in Honolulu, Hawaii in 1927. Upon graduating from high school, he relocated to West Virginia to attend Bethany College, but he was drafted after his first year and spent the next 18 months in the Army at Fort Shafter in Hawaii. When his service was complete, he returned to Bethany College and graduated in 1950 with a bachelor's degree in biology.

Malcolm was accepted to the UW School of Medicine as an alternate and waited anxiously until he was informed — only two months before classes began — that he had been admitted. But he still worried. He had heard stories about the “50-percent fail rate” at some medical schools. Malcolm remembers feeling relieved when, on the first day, Dean Edward Turner welcomed his class and told them that everyone who had been accepted was expected to graduate.

He did his internship at Receiving Hospital in Detroit, Mich. and settled in Butler, Pa. There he joined another doctor in a partnership at Butler Memorial Hospital. They established a physical therapy department and developed the emergency department to include full-time staffing with qualified physicians. In 1960, the two doctors proceeded to form a medical association — only the second one in existence in western Pennsylvania. Later they purchased and restored an 80-year-old school building for their office. In addition to their work at the hospital, the two also served as clinical instructors at the University of Pittsburgh and as consultants at the Butler Veterans Hospital.

Malcolm specialized in orthopaedics. He stopped practicing surgical orthopaedics in 1986, but he continued practicing in non-surgical orthopaedics until 1992. Since 1994, he has been involved with a volunteer clinic in Stuart, Fla. The clinic serves people who have lost their health insurance and do not have the ability to pay. He says, “There is great satisfaction in providing help with a patient's orthopaedic problems without regard to insurance clerks or gatekeepers. A one-on-one relationship — medicine at its best.” He lives in Renfrew, Pa. with his wife, Ilene. They have three sons and one daughter.

---

### **James Coulter, M.D.**

James was born in Wolf Point, Mont. in 1928. He did three years of pre-medicine studies at Northern Montana College, and then earned a bachelor's degree at the UW before enrolling in the School of Medicine. After graduation, he did a rotating internship at Providence Hospital in Seattle, followed by a general surgery residency with the U.S. Naval Hospital in San Diego, Calif., and a neurological surgery residency at the Collis P. and Howard Huntington Memorial Hospital in Pasadena, Calif.

---

### **Austin Case, M.D.**

Austin was born in Seattle in 1929. He received an undergraduate degree from Stanford University before enrolling in the University of Washington School of Medicine. Between his internship and medical residency at King County Hospital in Seattle, he served as a flight surgeon with the U.S. Air Force in France and North Africa. He followed his first year of residency training with a three-year psychiatry residency at the UW.

Between 1961 and 1970, Austin maintained a private practice in psychiatry, served as the medical director of Northwestern Life Insurance Company and as a part-time staff psychiatrist at the Seattle Veterans Administration Hospital, and joined the UW faculty in the Department of Psychiatry.

In 1970, Austin went to London for five years to study at the British Psychoanalytic Institute. He remained there another two years to help coordinate post-graduate clinical seminars. He lived in Seattle for a few years and then returned to London in 1984 to continue his work with the British Psychoanalytic Institute and other psychotherapy centers. He also established a private practice. When he returned to Seattle in 1992, Austin continued his work with the Seattle Psychoanalytic Institute, Children's Hospital & Regional Medical Center, his private practice, and his faculty position at the UW.

Austin lives in Bremerton, Wash. and still practices in the Seattle area. He has three children.

---

### **Duane Coon, M.D.**

Duane was born in Port Townsend, Wash. in 1926. After medical school, he completed an internship at Tacoma General Hospital, worked in Morton, Wash. for a year practicing anesthesiology, and then spent two years in the Army. He lived in Lakewood, Wash. for a time before fulfilling the long-held dream of moving to Southeast Alaska.

Petersburg, Alaska has been Duane's home for the past 42 years. He has no intention of retiring and still runs his general medicine practice 25 hours a week. He and his wife, Sharla Sue, go salmon trolling every summer and have done so since 1974. In 2000, Duane reported that he planned to teach his son, Brenton, how to catch fish so that he could eventually take over the boat. Brenton is now attending college at Oregon State University.

working with students. Eventually, a local hospital bought the practice. Thomas worked for two years in one of the hospital's clinics before deciding that if he could only work full time, he would rather retire.

Thomas and his wife, Alice, were happy to move into their beach house on Whidbey Island in Washington. They also live in Palm Springs, Calif. for part of each year. They enjoy spending time with their three children and their families — including nine grandchildren.

---

### **James Caillouette, M.D.**

James was born in Los Angeles, Calif. in 1927. He went to high school in Lakewood, Wash. and served in the U.S. Naval Reserve on active duty for a year. He attended the College of Puget Sound and earned a bachelor's degree before starting medical school at the University of Washington. When he graduated, he completed an internship and an obstetrics and gynecology residency at Los Angeles County General Hospital.

James settled in California and held career-long clinical and academic positions in obstetrics and gynecology with the University of Southern California Medical Center. He was also on staff at Huntington Memorial Hospital and St. Luke's Hospital, both in Pasadena, Calif. James also has been very active in the medical community and has held several offices within a variety of local, state, and national medical societies.

In a presidential address written for the *American Journal of Obstetrics and Gynecology* in 1998, James acknowledged the exceptional mentoring he received from UW School of Medicine professors. He highlighted Dr. Russell de Alvarez — the first professor of obstetrics and gynecology at the University of Washington — as a teacher who had a profound affect on him. He said, "Dr. de Alvarez was indeed strict and demanding, but he was also fair. That is all that we should ever expect from a mentor." He also spoke of the privilege of participating in the first renal dialysis procedure in Seattle while studying under Belding Scribner at Harborview Medical Center.

James retired from practice in 2002. He and his wife, Joan, married in 1950, and live in Pasadena, Calif. They have three children.

---

### **Thomas Carey, M.D.**

Thomas was born in Missoula, Mont. in 1928. He now lives in Seattle with his wife, Beverly. They have five children.

Ann, have two daughters. He now lives in Port Orchard, Wash. with his second wife, Gina, whom he met while traveling in the Philippines in 1989. George's life has been made richer by many hobbies, including skiing, camping, biking, tennis, photography, cooking, dancing, and choral singing.

---

### **G. Dean Barth, M.D.**

Dean was born in Spokane, Wash. in 1927. He entered medical school in 1948, but struggled with health problems. Dean says that he might never have become a doctor had it not been for Dean Edward Turner's kindness and support — Dr. Turner allowed him to take time off and start school again with the class of 1954.

He did a one-year rotating internship at Philadelphia General Hospital and, just a few days after finishing, became a busy general-practice doctor for four small farm towns in the Palouse wheatfields of southeastern Washington. He also worked and trained with four general practitioners at a 65-bed hospital. When Dean's practice grew, he acquired a partner, and they built a new office building. Dean then returned to Philadelphia for a two-year surgical residency. After completing it, Dean returned to his rural practice and worked there for 18 years. He and his wife, Laura Jo, had three children, and loved being a part of their small-town community.

In 1972, when the demands of rural practice began to wear on Dean, the family decided to move to Vancouver, Wash. He joined a large family practice group for a few years, and then later became interested and involved in emergency medicine and geriatrics. When Dean retired in 1995, he had served as the medical director of 13 different nursing homes and a partner in three urgent-care clinics.

Dean and Laura Jo are enjoying an active retirement in Vancouver with many friends and family — a family that now includes six grandchildren. They spend part of each summer at their cabin on Hayden Lake in northern Idaho, and winter on a golf course in the Southern California desert. Dean considers himself “fortunate to have been a product of the University of Washington School of Medicine.”

---

### **Thomas Brooks, M.D.**

Thomas was born in Anacortes, Wash. in 1926. His father was a general practitioner in Anacortes, and Thomas wanted to follow in his footsteps. After completing his internship, he returned to Anacortes and joined a practice. His partner, who had been in the area for seven years, died suddenly only a year later. Thomas purchased the clinic and continued primary-care practice with another physician until 1997.

One of the highlights of his career was the practice's involvement in medical students' education. After the clinic was accepted as a clinical clerkship site, Thomas spent 20 years

teachers helped us establish very useful and satisfying lives. That is the ever-radiant beauty of education.”

Arthur’s wife, Betty, was killed in a car accident in 1981; they had four children. He remarried in 1985. Arthur retired in 1994, and he and his wife, Janice, live in Chapel Hill, N.C.

### **Arthur M. Anderson, M.D.**

Arthur was born in Seattle in 1930. After completing undergraduate studies and earning an M.D. at the University of Washington, he did an internship at Johns Hopkins Hospital in Baltimore, Md. and an internal medicine residency with the Tulane Medical Service at Charity Hospital in New Orleans, La. He returned to Seattle and served as chief medical resident at the UW in 1957-58. Arthur then enlisted in the U.S. Navy Medical Corps and remained on active duty until 1960. When he returned, he completed a one-year cardiology fellowship at the UW.

Arthur stayed in the Seattle area and started a private cardiology practice and a partnership at the Seattle Heart Clinic. He was an associate professor at the UW until his retirement in 1995 and currently serves as a medical examiner for the Federal Aviation Administration. Arthur and his wife, Katherine, live in Bellevue, Wash. and have three sons.

### **George Balyeat, M.D.**

George was born in Great Falls, Mont. in 1927. He attended high school in Washington and then spent a year in the U.S. Navy in California before attending college: the first year at Washington State University, and the last three in pre-med studies at the UW. George then enrolled in the School of Medicine. After graduating, he did a rotating internship at Memorial Hospital in Phoenix, Ariz. and began his career in general practice with a doctor in Sunnyside, Wash. He then moved his practice to Hollister, Calif.

In 1961, George returned to the Navy and enrolled in the flight-surgeon program in Pensacola, Fla. He served as a flight surgeon in Key West, Fla. during the Cuban Missile Crisis, and was assigned as a senior medical officer aboard the aircraft carrier USS *Coral Sea*. He took a short break from the Navy to pursue his master’s in public health at University of California-Berkeley. In 1966, he enrolled at the Naval Aerospace Medical Institute to complete the aerospace medicine program. Until his retirement in 1979, George continued his career in the Navy as a flight surgeon, instructor, and medical resident supervisor.

After retiring from the Navy, George spent 11 years practicing medicine in California, and retired completely in December 1991. He and his first wife, Cherry

---

### **Arden O. Anderson, M.D.**

Arden was born in Cooperstown, N. Dak. in 1926. After graduating as high-school class valedictorian in 1944, he joined the U.S. Navy and served in WWII for two years.

When he returned to the United States, he enrolled at the University of Minnesota and earned a bachelor's degree — a double major in psychology and zoology — and proceeded to get his master's degree in parasitology and psychology.

He married in 1951 and entered the University of North Dakota, where he earned another bachelor's degree in medicine before traveling west to begin medical school at the University of Washington. Arden returned to Minnesota for internship training at Anchor Hospital in St. Paul, and specialized in family practice with a focus on geriatric medicine. He had a private practice in Brainerd, Minn. for 36 years, and served on staff at local clinics and hospitals.

Since his retirement from practice in 1991, Arden has kept busy consulting on long-term care and serves as the medical director of long-term care facilities in Brainerd. He works a few hours a day during the week and is still involved with resident training. Arden and his wife, Bertie, have five children.

---

### **Arthur A. Anderson, M.D.**

Arthur was born in Tacoma, Wash. in 1926, and earned a bachelor's degree in psychology at the UW before enrolling in the School of Medicine. He did a rotating internship at Indianapolis General Hospital, followed by a psychiatry residency at Cornell University Medical Center at the Payne Whitney Clinic in New York City. Thinking he needed more experience in public health and community mental health and treatment in order to set up clinics for disadvantaged youth and families, Arthur did a one-year community psychiatry post-graduate fellowship at Harvard Medical School in 1969. He continued to work with Cornell and Payne Whitney Clinic as an instructor and assistant clinical professor of psychiatry through 1985. He also served as the director of Cornell's Community Mental Health Action-Research Program, and continued to take an interest in research through 2003, primarily as the principal investigator in a 30-year public-health research survey called the "Peacemaker Project."

In addition, Arthur maintained a private practice in New York City from 1958 to 1985 and a private practice in Stamford, Conn. from 1978 to 1993, and served as an attending psychiatrist at Stamford Hospital.

Arthur attributes his early fascination with psychiatry to his UW professors. He is grateful for the education in cooperative healing and civil dialogue he received during bedside conferences and grand rounds. He says, "I believe that I speak for my classmates, as well as myself, in stating that our UW training experiences with top-quality

## Class of 1954

### Alfred Alden, M.D. 1926-2003

Born in British Columbia to American parents, Alfred spent his grade-school years in a one-room country school. After he completed eighth grade, his teacher encouraged him to continue his education rather than joining his father and brother in full-time logging work. Although he chose to work, Alfred was able to keep up with his studies, and graduated from high school. He won a four-year scholarship to the University of British Columbia, but his father felt that the money should be used to benefit the family's farm, and Alfred returned to a job at the smelter. He was later accepted into the accelerated, three-year M.D. program at Queen's University Medical School in Ontario, but, unable to raise the tuition, he returned again to his farm, mill, and mine work. It was Alfred's uncle who one day reminded him that he was an American citizen. Without hesitation, Alfred decided to move to the United States.

Alfred settled in Richland, Wash. and worked first as a medical clerk at Kadlec Hospital, where he met his future wife, Marilyn, a co-worker. He then worked as a construction clerk in the restricted areas near the Hanford Nuclear Reservation. Saving all the money he could, Alfred moved to Seattle and registered in the UW's second-year pre-med program and submitted an application to the School of Medicine. Determined to begin medical school at last, he was thrilled to learn that he had been accepted into the Class of 1954.

After earning his M.D., Alfred was matched to a Navy internship, but, based on strong advice from a mentor, Alfred decided to accept an internship at Harborview Medical Center instead. Upon completing the internship, Alfred was offered six residencies at the UW. He initially chose surgery, but ultimately decided to apply for an Army residency. It took approximately six months to induct and place Alfred into the Army, and, during that time, he completed a pathology residency in Seattle. Later, he was assigned to a five-year residency in internal medicine at Tripler U.S. Army Hospital in Hawaii, which included training in cardiology, urology, surgery, and dermatology.

After many years in military service, Alfred resigned, and he and Marilyn happily moved back to Richland. As a partner in a group clinic, he had a large urology practice for three years, and then undertook a brief partnership with another respected urologist before retiring in 1996. When Alfred passed away in March 2003, he and Marilyn had been married for more than 50 years and had five children.

## 2004 Award Recipients

### Distinguished Alumni Award Recipient Jerry Trier, M.D. '57, Res. '62

Those who know him describe Dr. Jerry Trier as a classic mentor and “a very selfless man.” Trier, a successful doctor, researcher, and teacher, is being honored for his outstanding contributions to the field of gastroenterology. He has spent the past 30 years of his career at Harvard, where he produced numerous papers on gastroenterology. Among his many achievements, Trier was the first researcher to culture human intestinal biopsies *in vitro*, a process that allows controlled experimental conditions, now practiced worldwide. Trier values his tenure as director of the Division of Gastroenterology at Brigham & Women’s Hospital in Boston. Under his leadership, the division and its training program became nationally competitive. Most gratifying, though, Trier says, has been the opportunity to mentor fellows and trainees. Like a father, he is very proud of what they have accomplished. “In a sense, they are your children,” he says. For these reasons, and many others, he is the recipient of the 2004 UW Medicine Distinguished Alumni Award.

### Humanitarian Award Recipient Walt Hollow, M.D. '75, Res. '78

“Some people are born caretakers,” says Walt Hollow. Hollow is one such person, as well as a trailblazer and visionary leader. The first American Indian in the WWAMI region to receive an M.D. degree, Hollow is director of American Indian faculty development at the UW School of Medicine and a family practitioner at the Seattle Indian Health Board and at Group Health Cooperative. With the UW Medicine Alumni Association’s 2004 Humanitarian Award, he is being recognized for his commitment to attracting American Indian students and faculty to the School of Medicine and for improving medical treatment for American Indians. Early in his career, Hollow knew he wanted to mentor undergraduate American Indian students. Among his many achievements, Hollow helped create an informal social group that later became the Medicine Wheel Society. Hollow also wanted to ensure that all practitioners, regardless of race or culture, could successfully treat Native Americans. “All of us,” says Hollow, “need to interact with other cultures, help them, and ask them to help us.” As teacher, caregiver, and activist, this year’s Humanitarian Award recipient has lived by these words, and earned his peers’ admiration and respect.

## Medical Alumni Service Award Recipients

2003	Bruce C. Gilliland, M.D., Res. '64
2001	Richard H. Layton, M.D. '54
1998	John Philip Sauntry, M.D. '51

*“How far you go in life depends on your being tender with the young, compassionate with the aged, sympathetic with the striving, and tolerant of the weak and strong. Because someday in your life you will have been all of these.”*

— George Washington Carver

## Honoring the Class of 1954

The 50-Year Association was created to honor medical alumni who have celebrated their 50th anniversary as a graduate of the School of Medicine. The association recognizes and pays tribute to their long-term relationship with the school and their dedication and commitment to the medical profession.

### **We salute and welcome the class of 1954 to the 50-Year Association:**

Arden O. Anderson, M.D.
