

# DIAGNOSTIC IMAGING SCIENCES CENTER

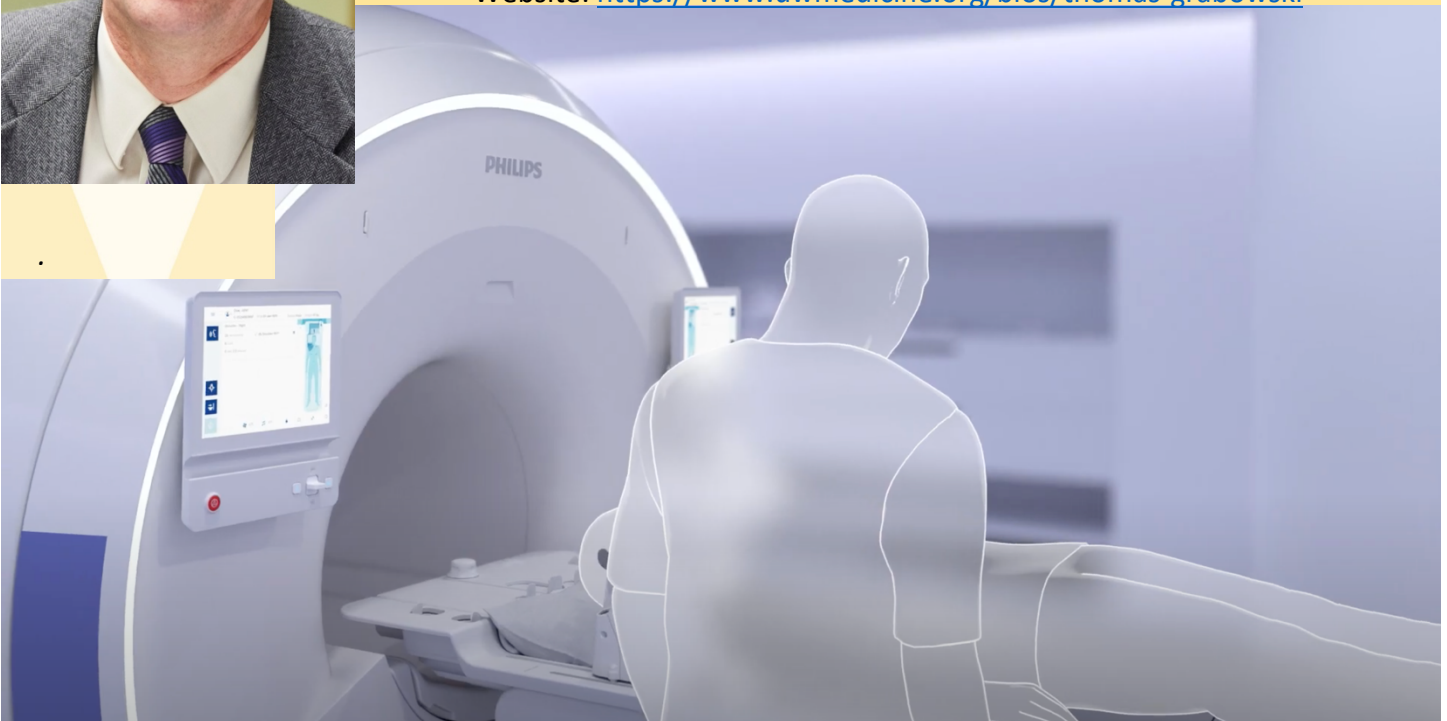

## *Imaging Researcher of the Month*

### *Dr. Thomas J. Grabowski*

Professor,  
Department of Radiology  
Department of Neurology  
Director: UW Alzheimer's Disease Research Center  
Adjunct Professor,  
Psychiatry and Behavioral Sciences  
Psychology

Website: <https://www.uwmedicine.org/bios/thomas-grabowski>

### **What is the primary scientific focus of your research?**

*We're working to understand brain organization using brain imaging and applying it to understand neurological diseases especially Alzheimer's Disease.*

### **What is the relevance of your work to the public health?**

*We have two goals: One, to detect the disease before people have symptoms, and two, to diagnose Alzheimer's disease more accurately.*

### **How has DISC helped you achieve your scientific and public health goals?**

*DISC is a state-of-the art imaging facility. DISC members go above and beyond to provide us the innovative protocols we need for advancing our science.*
