

# EDPSY 528 A

## Achievement Motivation in Education

Winter Quarter 2019

Thursdays 4:30-6:50

3 credits

Motivation is among the most important psychological concepts in education. In this course, you will learn about major theories and the latest research in achievement motivation as it relates to P-12 schooling, culture, interventions, and the brain. This seminar-style course is ideal for any graduate student or future educator interested in gaining a better understanding of motivation and how it shapes student learning and success.

### About the Instructor

Dr. Matthew Kim, PhD is a Research Scientist at the Institute for Learning and Brain Sciences and Lecturer in the UW College of Education.

### Enrollment

Prerequisite: EDPSY 501 (or similar prior coursework) or instructor's permission.  
Email [edcodes@uw.edu](mailto:edcodes@uw.edu) for add code.
